A Message to Our Friends and Customers

The men who grow trees and plants and the man who buys them are both beneficiaries of a good reputation. The truth is contrary to this. **REPUTATION IS A REWARD**, to be sure, but it is really the beginning, not the end of an endeavor. It should not be the signal for a let-down, but rather a reminder that the standards which won recognition can never be lowered.

We sometimes speak of winning a reputation as though that were the final goal. The truth is contrary to this. **REPUTATION IS A REWARD**, to be sure, but it is really the beginning, not the end of an endeavor. It should not be the signal for a let-down, but rather a reminder that the standards which won recognition can never be lowered.

We strive always to further educate and improve our organization for the service of our customers, and believe we are growing, packing, and shipping trees and plants equal in value to any available in this country today, and feel satisfied that our customers are prosperous from our efforts, which is an incentive to continue giving our personal attention to all phases of our business, happy in the thought that both are benefitted.

Sincerely,

CLAYTON A. BUNTING, President.

Sectional view of 500,000
2-year Apple Trees aver-
aging 5 to 6 ft. in height.

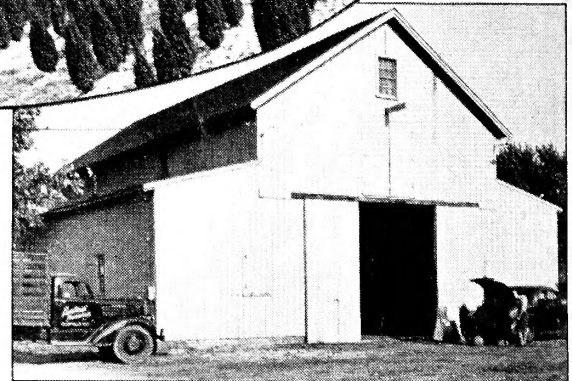

Sectional view of 750,000 young Peach
Trees, ready for the commercial orchardists
and home gardens.

Irish Junipers
growing in our
nurseries. We
grow annual-
ly 100,000 or
more Ever-
greens of all
leading varie-
ties.

From this
building large
orders for Rose
bushes are as-
sembled for
shipment. We
grow more
than 200,000
Rose bushes
each year for
the more par-
ticular Rose
enthusiasts.

We oftentimes wonder if those who invest their money in perishable products like trees and plants realize the value of such facilities as our modern packing houses, where your orders can be handled without any damage to the roots from dry winds or frosty atmospheres. We have invested carefully in such buildings to facilitate our organization in sending you trees and plants in good, live growing condition. Damp sphagnum moss is used at the roots when packing for shipment the trees and plants you receive from us.

About Shipping Time, Etc.

SHIPPING SEASON. We begin filling orders about September 1st and continue digging and shipping during the entire fall, winter and spring until June 1st. We are sometimes delayed in January, February, and the early part of March by freezing weather, but usually are able to ship most of the time during these months.

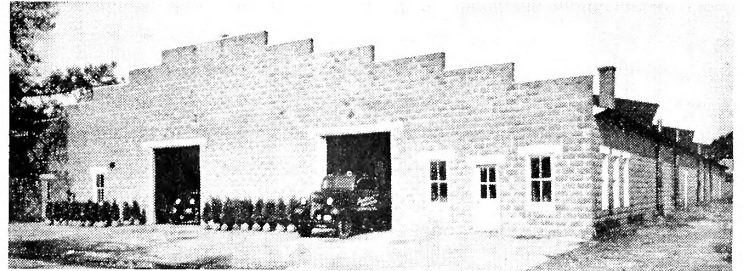

TERMS. Cash with order, but orders will be booked if one-fourth value is received with order, remainder to be sent before time of shipment. Remit by money order, registered letter, check or draft. Prices quoted herein are F. O. B. Selbyville. At these very reasonable prices we do not prepay transportation.

GUARANTEE. We guarantee to pack and ship good, clean, thrifty, well-grown trees and plants in good growing condition, and under ordinary conditions, if properly transplanted and cared for, will grow. We cannot, under all circumstances, guarantee trees and plants to grow, because there are so many reasons for their failure that are entirely beyond our control, such as improper planting, over-fertilization, droughts, floods, frosts, etc. Claims, if any, must be made within five days from receipt of stock.

REFERENCE. We refer you to Dun & Bradstreet, Inc.; Baltimore Trust Company, of Selbyville, or any business house in Selbyville.

Telegraph or telephone us at Selbyville, Delaware. Telephone No. 2321.

From this building all Parcel Post orders are assembled for a general line of trees and plants. 50,000 to 60,000 orders are shipped from this department each year to all parts of the U. S. A.

One of our office buildings, purposely illustrated to demonstrate an evergreen foundation planting. Ask our Landscape Department to assist you with your planting plans.

Hale-Haven

Hale-Haven

A Premium Peach for Every Commercial Orchard. Ripe 2 Weeks Before Elberta.

Steadily gaining favor, because of its size, color, good shipping qualities and hardiness in bud.

This marvelous new peach, an introduction of the Michigan State Experiment Station, is a cross between the famous South Haven and J. H. Hale. It's an aristocrat of the first order.

Extremely high color before ripening; withstands cold temperatures; very hardy; heavy bearer. A perfect freestone, yellow fleshed.

Prices, see page 6.

Elberta

Peaches *Bear Heavily* in three or four years

Peaches are divided into white flesh sorts and yellow flesh sorts. The former are the earliest in the season, juiciest, and sweetest, but very few markets prefer them to yellow peaches. The latter, however, are firmer, ship better, and are better liked in a great majority of markets.

Another division of peaches may be made, clingstone and freestone. The clingstones are earlier and as a class are not as well flavored as the freestones. They are preferred by many for culinary purposes since they hold their shape better after cooking. For home use we recommend planting liberally of both the white and yellow flesh varieties, including, of course, some clingstones.

The peach will thrive upon a great diversity of soil, provided one condition be ever present—good drainage.

Buntings' Healthy, Well-Grown, Vigorous Trees Are Worth More

Quality in Peach trees is not a mere matter of the size of the trees at the time of purchase. It includes the horticultural skill, knowledge, care and personal integrity actually employed from the securing of the Peach seed to the delivery of the stock.

Tried and Tested in Our Own Orchards

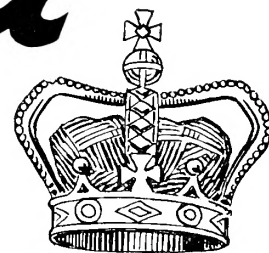

Considering our long experience in Peach tree production, the knowledge we have obtained in watching the trees in our bearing commercial orchards here in Sussex County, it is our belief that you cannot buy better Peach trees anywhere in the country regardless of price.

PRICES. The prices we are charging for our trees are as reasonable as we can make when considering extra quality of the stock.

Elberta

We grow
the original
strain

Still
the KING
of Peaches

Elberta leads all other peaches in number of trees in America. It is, too, the most popular of all peaches in the markets. The pre-eminent meritorious character of Elberta is its freedom from local prejudices of extra soil or climate—it is the cosmopolite of cultivated peaches, thus Elberta is grown with profit in every peach-growing state in the Union.

FRUIT MATURES IN MID-SEASON

3 inches long and 2¾ inches wide, roundish, with a pointed tip and skin thick, flesh yellow stained pink near the pit, juicy, firm but tender, good quality. stone free.

See top of page 6 for prices.

HARDEE

It Withstands Severe Winters

U. S. Plant Patent 120

**A NEW PEACH CULTIVATED TO RESIST
EXCESSIVE COLD**

**Produces Peaches and Lots of Them
When Other Trees Fail**

The Hardee Peach is a freestone, firm, yellow flesh, Elberta type; a good shipper, with a tendency to attain a slightly larger size than Elberta, and with a somewhat thicker skin. It produces good Peaches and lots of them when other varieties are winter-killed, thus it will make profits for you when the common sorts fail and when prices are highest.

Prices Per Tree on Hardee Peach Trees Only

Certified Fruit Trees

Our fruit trees are certified for trueness to name by ourselves, and we have been in the fruit growing business (as well as producers of trees) for more than thirty years. Also, each year, they are inspected for trueness to name by the staff of Dr. J. K. Shaw, Research Professor of Pomology, Massachusetts State College, and by Dr. W. H. Uphall of the Vineland, Ontario, Canada, Experimental Station, both of whom are recognized authorities on fruit variety certification. Every precaution is taken to assure you of getting the variety ordered.

• **GOLDEN JUBILEE** •

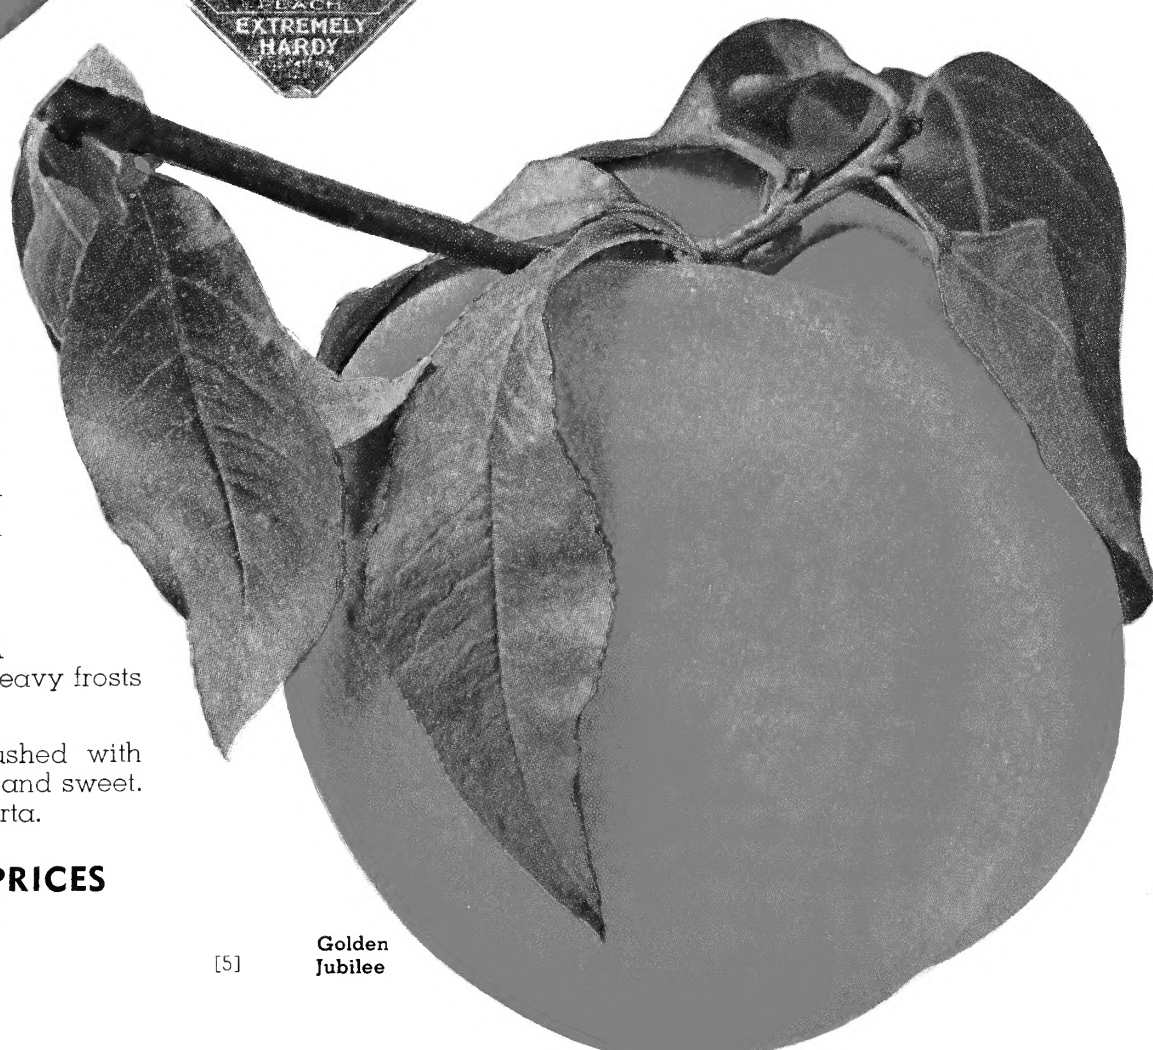

**Ripe 4 Weeks
Before Elberta**

An outstanding, comparatively new variety. Never has failed to bring high prices.

Already in extensive production.

Very hardy. Resists excessive cold. A sure cropper after severe winters and heavy frosts at blooming period.

A large early yellow freestone flushed with flaming red; flesh yellow, tender, juicy and sweet. Similar in general appearance to Elberta.

**SEE TOP OF PAGE 6 FOR PRICES

Standard PEACH TREES *the Pick of them all*

BELLE OF GEORGIA. Ripens the 1st to 5th of August. Fruit is large, white with red cheek; flesh white, firm, of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

BERK'S FAVORITE. Freestone. Ripens September 15th to 20th; size large, skin white with red cheek; flesh white; a good cropper and unexcelled shipper.

BRACKETT. Follows Elberta in ripening. Size large to very large. Orange-yellow skin tinted with carmine. Flesh is deep yellow. Very highly flavored. A very good one for home use and extensively planted in commercial orchards. Freestone.

CARMAN. A very hardy, semi-freestone Peach, ripening about the middle of July; skin pale yellow with blush on sunny side; flesh white, tender, sweet and melting. Ships well. Best early market Peach.

CHAMPION. Freestone. A western Peach of very large size and good quality; also noticeable for the regularity of its bearing. Skin is of a rich creamy white, with a red cheek; flesh creamy white, sweet and

delicious, rich and juicy. A most profitable and good selling market Peach. July 20th.

CRAWFORD'S EARLY. Freestone. Large, oblong, yellow with deep red cheek; flesh yellow, juicy and rich; excellent flavor. August 1st to 15th.

CRAWFORD'S LATE. Ripens after Elberta. Freestone. High quality and very large size; flesh deep yellow; skin yellow with a broad dark red cheek.

CUMBERLAND. Semi-freestone. A cross between Belle and Greensboro. Fruit above medium in size, attractive in color. Good quality.

EARLY ELBERTA. Very similar in both foliage and fruit to the old reliable Elberta. Ripens a week before this well-known variety.

ECLIPSE. Freestone. Large dark red, yellow-fleshed with good flavor, ripening in July. Excellent shipper and good variety to replace Hiley.

FRANCIS. Ripens about August 25th to September 1st. Skin yellow with red cheek. Flesh yellow. A very desirable variety to follow Elberta. Generally known as half-sister to Elberta. Freestone.

GREENSBORO. Semi-cling. Ripens from June 25th to July 10th. Large, white with a red cheek. Flesh white, rich and juicy. Tree a strong grower.

HILEY. Ripens about a week before the Belle of Georgia; also a seedling of the Belle. Tree very hardy. A large creamy white Peach with rich blush; flesh white. Freestone.

IRON MOUNTAIN. Ripens September 1st. White, freestone. Fruit is of large size, color white, good quality.

J. H. HALE. Freestone. One of the best sorts for market or garden. Fruit is very large, round, yellow, sweet and melting; quality excellent. Skin yellow, finely colored. Ripens just before the Elberta. A very good one.

KRUMMEL. Freestone. Season of ripening in Delaware about September 10th to 20th. Fruit quite large, fine flavor, skin yellow splashed with red. Fine for canning or preserving.

MAYFLOWER. Very early red. Hardy. Cling.

RED BIRD CLING. (Early Wheeler). Very early, white, cling, extra large with a bright red blush; an excellent shipper.

ROBERTA. Yellow; freestone; ripens about 10 days after Elberta, which variety it resembles very closely. A new variety which fruit growers are planting extensively. Ripens at a time to bring good prices.

ROCHESTER. Has the habits and characteristics of the Crawford, but fully two weeks earlier. Yellow; freestone; good size; very sweet, fine flavor. Requires only half the usual amount of sugar for canning. Ripens middle July.

SALBERTA. Late. Large yellow freestone. Ripens about one week after Roberta.

The young four-year-old orchard illustrated below is proof of the quality of Buntings' Peach Trees.

Note well-branched heads, sturdy trunks, and heavy root system of our trees as shown in the illustration.

STANDARD PEACH TREES

SALWEY. Freestone. Flesh yellow, firm and juicy. Especially good for canning and preserving.

SLAPPEY. Freestone. Yellow flesh, medium to large size.

SHIPPER'S LATE RED. Follows Elberta in ripening. Skin yellow with attractive red coloring. Flesh yellow, juicy, sweet, pleasing flavor. Bears young; good late commercial variety. Freestone.

SOUTH HAVEN. Early, freestone. Large, deep yellow with red cheek. Heavy bearer. One of the best paying varieties for commercial orchards. Comparatively new,

but tried and tested in a commercial way for several years.

VEDETTE. Freestone. Ripens a few days before Valiant. Fruit is large, roundish oval, yellow flesh. Ripens three weeks before Elberta.

VALIANT. Freestone. Fruit large, yellow blushed with red, with firm, juicy flesh of very good quality. Ripens about two weeks ahead of Elberta.

WHITE HEATH CLING. Ripens September 10th to 15th. Fruit extra large, roundish; flesh white, exceedingly juicy.

See prices page 6 for above varieties.

Redelberta A DOUBLE RED ELBERTA that REDDENS 10 DAYS EARLIER

A Double Red Elberta That Reddens 10 Days Earlier

(U. S. Plant Patent No. 232.)

The old reliable Elberta with all its good characteristics retained **PLUS bright red color 10 days earlier.**

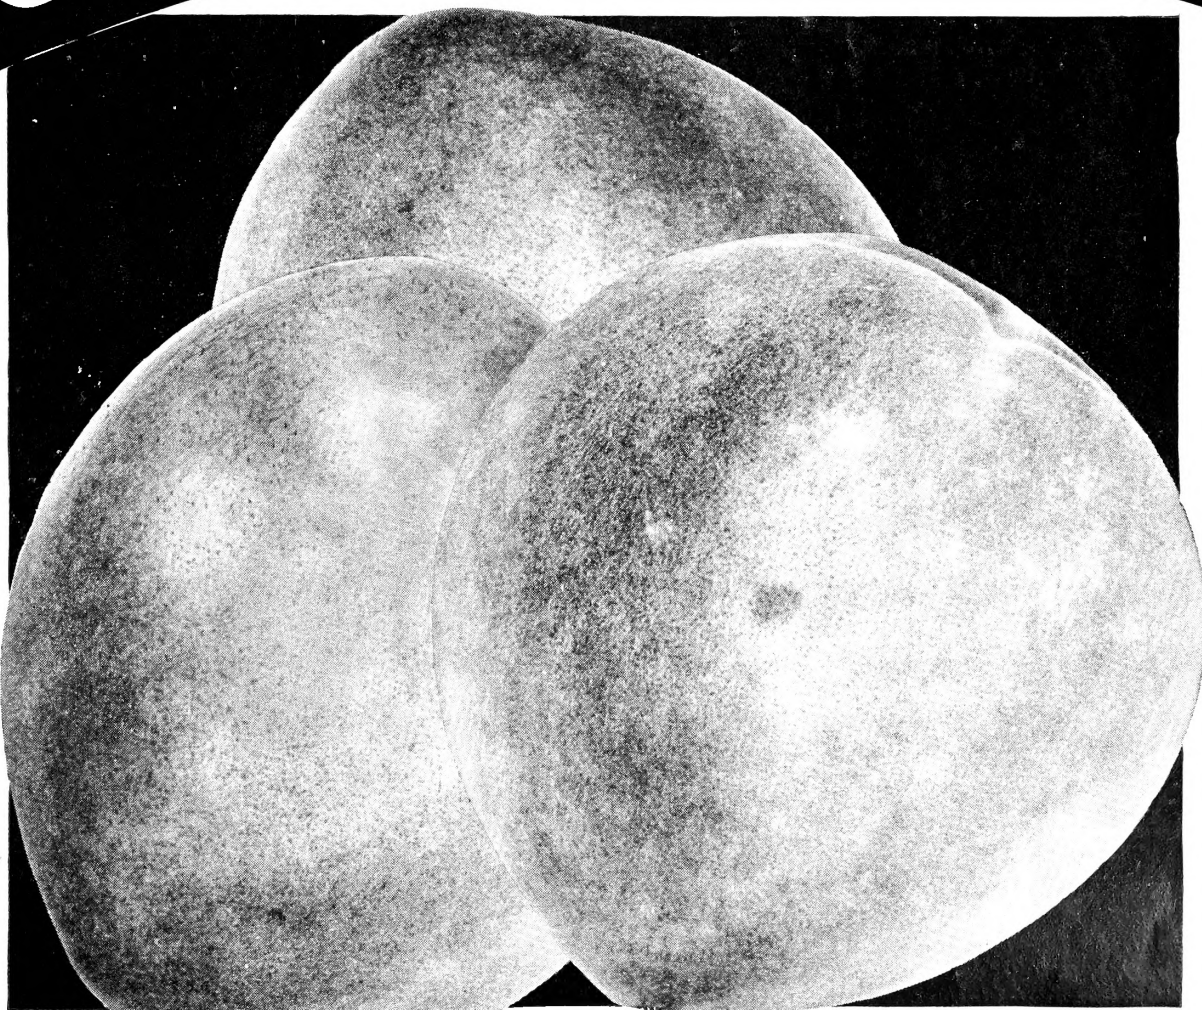

This Peach is identical with Elberta in tree and fruit, except that the **fruit ripens approximately 10 days earlier** than common Elberta and has fully **double the red color** of that variety.

For the profitable earlier markets, you can't beat Redelberta. With its early red color and earlier picking season, it can be shipped firm ripe. For generations Elberta has been the standard commercial Peach variety by which all other varieties have been judged, and now Dame Nature has given us an improvement on it. A bud sport or mutation, originating in the orchard of Mr. Jay Perry, Kennewick, Washington.

BLACKMACK

Trade Mark Registered

Colors a Solid Deep Red Two Weeks Earlier

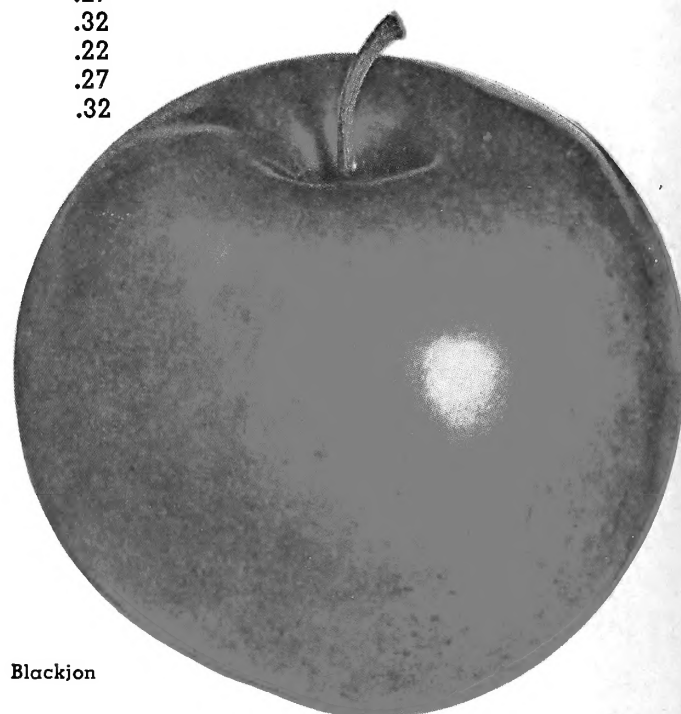

This is a strain of McIntosh which colors two weeks in advance of the regular variety. A solid deep red which can be picked in prime condition, which improves shipping and eating qualities and eliminates loss from windfalls.

BLACKJON

Trade Mark Registered

It's Patented A Superior Deep Red Jonathan

This apple is the same as the common Jonathan in flavor, quality and productiveness. It is different from the common Jonathan in that it attains an intense bright red color from two to three weeks earlier and can be picked while hard ripe. Those who like a crisp, juicy Jonathan with a beautiful deep cherry-red color can be sure of getting it in the Blackjon.

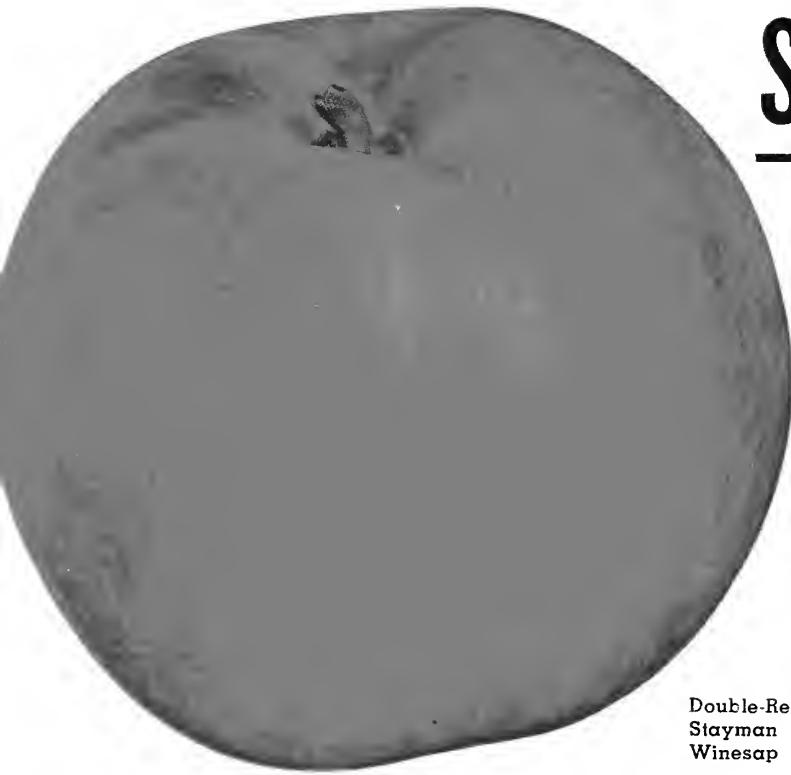

Blackjon

Superior Bunting Apples

Double Red Stayman Winesap

Carries at least double the color of the original strain of Stayman Winesap; otherwise exactly the same in growth, hardiness, etc. We have discontinued propagating in our nurseries, also growing in our orchards, the regular variety of Stayman Winesap, in view of the fact that we get the same quality in Double-Red Stayman with double the color which sells the fruit for more money.

See page 10 for prices on Double Red Stayman Winesap, Yellow Delicious and Solid Red Rome.

Double-Red
Stayman
Winesap

Yellow Delicious

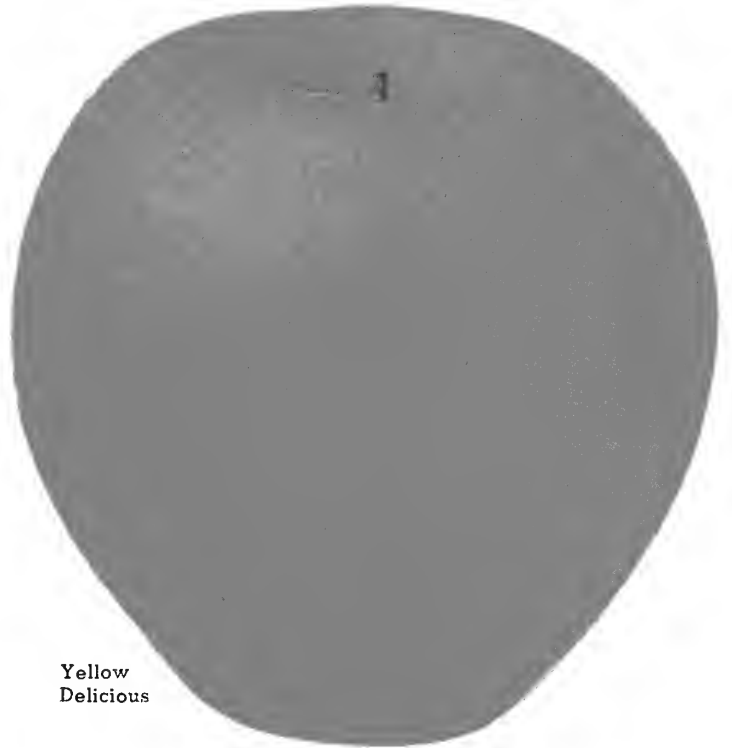

It's Golden with Flushed Cheek

This alluring apple with the strong appetite appeal never fails to capture the elusive nickel on the fruit stands.

It is a national favorite, commanding highest prices on the market.

Very Young Trees Bear These Luscious Apples

Where Apples grow, YELLOW DELICIOUS is 100% successful. In the South it produces bumper crops, selling at very high prices; does equally as well in the North because of its extreme hardiness. See prices page 10.

Yellow
Delicious

Solid Red Rome

Noted for Productiveness and Red Coloring

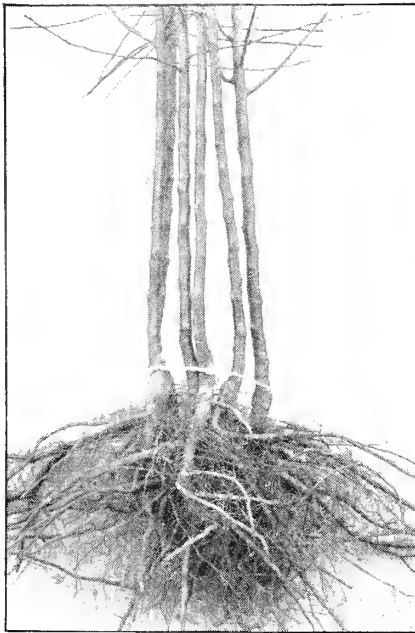

A brilliant, solid red that produces over 50 per cent more extra fancy apples for color grade than common Rome Beauty. A beautiful apple identical in quality, productiveness and other characteristics with the regular Rome, except for a greatly superior color. We can supply either Gallia Beauty or Cox's strain of Red Rome Beauty. The apples are similar in color but the Cox's strain will average larger in size and will keep better in storage.

At regular prices, see page 10.

Solid Red Rome

Leading orchardists are more enthusiastic than ever over Buntings' "Double-Red Apples." They are the varieties that sell at good prices on all markets.

ROOT GROWTH

It's the Bunting Story of Better Trees

This photograph was made to give our customers some idea of the root system of our fruit trees, also straight sturdy trunks. Trees of this type transplant well, bear fruit early.

APPLE TREES

Roots

Buntings' Trees are grown to make sure they can be transplanted successfully without setback to their growing and bearing power. By our method of spacing in the nursery, heavy fibrous roots are formed, the wood is hardened and the fruit spurs started. This means you get a true-to-name, trained and developed tree to take hold quickly in any location, a tree that is far superior in vigor and fruitfulness.

STANDARD APPLE VARIETIES

ALBEMARLE PIPPIN. Yellow, medium in size, with tender, crisp, juicy flesh. Excellent quality, late keeper.

BALDWIN. Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor. Splendid keeper.

BONUM. Medium size. Red. Ripens late fall. Originated in No. Carolina.

CORTLAND. Winter. The fruit is medium to large in size, of a bright red color. Flesh is pure white and of very good flavor.

SOLID-RED DELICIOUS. The leader of all Red Apples. Our own selected sport of this famous variety. An excellent apple for either home use or market. Same characteristics as its parent, except for its double red color three weeks earlier.

SOLID-RED DUCHESS. Sport of Duchess. Fruit is large, symmetrical, skin moderately thick, flesh yellowish white, firm, juicy and sub-acid.

EARLY HARVEST. Medium to large. Pale yellow. Tender with a mild fine flavor. One of the first to ripen.

EARLY MCINTOSH. Summer. Holds same prominent qualities as the winter McIntosh. Flesh white, tender, juicy and fine flavor.

FALL PIPPIN. Greenish yellow. Large, excellent fall apple for cooking and dessert. Home and local market.

GANO. Large apple, perfect shape, smooth, glossy, deep red skin. Flesh white, rather coarse and crisp.

DOUBLE-RED GRAVENSTEIN. Flesh yellowish, acid, aromatic. Much better color than the original Gravenstein.

GRIMES GOLDEN. Very large, skin golden yellow, flesh tender and crisp. A very good fall apple. Grown in all sections of the country.

DOUBLE-RED JONATHAN. Insure your profits from Jonathan by planting this new red sport that will give you bright red-colored fruit about two weeks earlier. Fruit medium to large, brilliant red, juicy, fine grain,

tender and very highly flavored. Bears young; produces heavy crops every year.

KING OF TOMPKINS COUNTY. Very large, round, oblate, yellow striped with bright crimson; flesh yellow, crisp, melting, with a rich, high, aromatic and very agreeable flavor.

LOWRY. Very juicy, slightly sub-acid, of mahogany-red color; a medium heavy bearer and a sure one.

MACOUN. A cross between McIntosh and Jersey Black. Shape of the fruit is similar to that of McIntosh; color is darker red with less stripe; flesh is much the same color, texture, flavor and aroma as McIntosh.

MAIDEN'S BLUSH. Medium size, pale yellow and a beautiful red cheek; flesh white, tender, pleasant sub-acid flavor; very productive.

SOLID-RED MCINTOSH. A selected bright red sport of the reliable old McIntosh. Medium size, flesh white, tender, juicy, sub-acid. Tree hardy, vigorous and healthy.

MILTON. A McIntosh-like apple, ripening a month before McIntosh. Tree hardy, vigorous and an annual bearer. The fruit is pinkish red with a heavy bloom most beautiful. Flesh white, tender, crisp, juicy.

NERO. Deep red, with handsome shading. Medium large size, of good quality and excellent flavor.

RED NORTHERN SPY. Flesh juicy, rich, crisp, aromatic, of good flavor. Our own selected sport of this popular northern apple.

NORTHWESTERN GREENING. Fruit large, green, becoming yellowish green when ripe. Flesh yellow, fine-grained and firm.

PARAGON. Winter. Skin smooth, yellowish, covered with deep red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic.

RED ASTRACHAN. Large, roundish, nearly covered with deep crimson. Juicy, rich acid fruit. A good bearer.

It will pay you Better

To Buy Buntings' Fruit Trees. There is no economy in planting very young trees just because they are cheap. You cannot afford several years waiting to see what will happen. Make sure of results by setting Buntings' Selected Trees.

Bunting Grown *Choice Specimens* for *Quick Results* **Standard Apple Trees**

RHODE ISLAND GREENING. Rich acid flavor, tender and juicy; yellow in color, sometimes having a red cheek. Very delicious.

SMOKEHOUSE. Winter. Fruit medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red.

STARR. Large, yellowish, smooth skin; sometimes marked with a faint blush and russet dots. Flesh yellow, very tender, crisp, juicy.

SUMMER RAMBO. Large, yellowish green splashed with red. Crisp and tender.

SWEET BOUGH. Large, pale yellow; summer apple.

SWEET PARADISE. Excellent quality; greenish yellow; sweet. Medium size.

TWENTY OUNCE. Large. Excellent cooking and baking apple.

VIRGINIA BEAUTY. Resembling Red Delicious in quality and color, but much darker in color.

WEALTHY. Fall. Almost solid red. Flesh white, tender, crisp, juicy, fine grained. A good keeper.

WILLIAMS EARLY RED. Among the earliest to ripen and the largest of all early apples. Flesh is white and slightly tart.

WILLOWTWIG. Winter. Rather early, and regular bearer. Medium to large, light red apple, of good quality.

WILSON RED JUNE. Early, enormous in size for an early apple. Skin a brilliant, glorious deep red.

WINESAP. Medium to large size. Red color, flesh yellow, firm, crisp, with rich flavor; good quality.

WINTER BANANA. Size large, golden yellow, with bright crimson-red. Flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor.

WOLF RIVER. Large, handsome, bright yellow skin, mottled with deep red and broad stripes of bright carmine.

YELLOW TRANSPARENT. Fruit medium to large, with a brilliant waxy skin; flesh is tender, crisp, and juicy; color yellow. Ripens in July.

CRAB APPLES

RED SIBERIAN. Large, round, brilliant red on a pale yellow background. Flesh acid and greatly esteemed for preserves and jellies.

TRANSCENDENT. Fruit large, round; skin smooth, rich yellow shaded with red. Flesh yellow, crisp and juicy.

WHITNEY. Fruit red striped, large, uniform in size. Skin smooth, glossy, yellow striped and splashed with carmine. Flesh firm and juicy.

HYSLOP. Large, handsome, crimson, splashed with dark red. Very prolific.

REDYORKING

TRADE MARK REG.

ORCHARDISTS,
HERE'S THE
APPLE THAT
WILL MAKE
HISTORY.

A sport from its famous daddy, York Imperial. It has the same fine and dependable qualities except that its skin is thicker, does not scald in storage, and it ripens to a solid cherry-red color.

Shows color 5 weeks earlier. An excellent shipping apple. Plant these early ripening Red Yorkings and get into the market with a sure profit-making new variety that finds a ready sale. Offered for the first time at regular standard prices. **See page 10 for prices.**

A partial view of a block of 50,000 one-year Cherry trees. Note vigorous growth. We have been complimented by Nurserymen from all sections of the country on this block of Cherries, all of them reporting having never found better one-year Cherries in any Nursery.

The Great MONTMORENCY

These select record-breaking Montmorency trees develop into uniform shapely specimens bearing heavy crops of very large fruit.

Fruit large, firm, ships perfectly. Bears very young, produces tremendous money-making crops and is successful everywhere.

Fruit Growers Consider This the Finest Sour Cherry In Cultivation

Because of its distinctive acid flavor, delightful in pies and preserves.

Black Tartarian

Cherries

Only
the Choice
Varieties

We do not believe in confusing our friends by listing too many varieties. Success will be yours if you confine your selection of cherry trees to any of the varieties listed below. They are preferred by experienced growers as amazing bearers of firm, juicy fruit that commands fancy prices.

Sour Cherries

PRICES OF SOUR CHERRY

ENGLISH MORELLO. Tree small, round-headed, with distinctly drooping branches. Fruit three-fourths of an inch in diameter, color dark red. Flavor tart, good quality; excellent for preserving and pies. Freestone. Ripens in July.

EARLY RICHMOND. A leading Sour Cherry, used extensively by canners, excellent for pies, and preserves. Tree medium size, dense, upright-spreading. Fruit three-fourths inch in diameter, color light red, fruit thin-skinned, freestone. Ripens in June.

Sweet Cherries

BLACK TARTARIAN

The Best Sweet Cherry

Here is the best, most dependable and widely successful of the sweet cherries. Its great heart-shaped fruits (rich, dark purple hue) look irresistibly tempting. The sweet, mild flavor and rich tang have won for it a nation-wide popularity both with commercial and home growers.

A Prime Market Favorite

For the big market trade hundreds of miles from orchards, the local fruit markets or fruit stands scattered all over the country, they offer a dependable yearly yield that is sure to bring profit to the grower.

Write for prices on quantities of 300 and more.

GOVERNOR WOOD. Light yellow with red cheek; tender, rich, delicious; very fine, large, roundish. June.

NAPOLÉON. Light lemon-yellow, tinged with red. Late June.

SCHMIDT'S BIGARREAU. Flesh tender, juicy, good flavor. Mahogany color. Middle of July.

YELLOW SPANISH. Ripens early in June. Fruit large, color yellow. Tree vigorous grower.

Plums

Hardy Sorts

Most prolific of all fruits —1 tree will yield up to 50 gallons big, soft flesh, delicious plums.

Buntings' extra heavy, 2-year trees grow with little care.

Fellenberg (Italian Prune)
A Universal Favorite

Burbank Plum

All varieties of Plums, especially the Asiatic sorts, make handsome ornamental trees as well as being rich in fruit. You will find Buntings' Selected Plum Trees fruitful, ornamental and shapely.

Quince Trees

For Jelly, Jam and Marmalade

	1 to 9 Trees	10 or More Trees
3 to 4 ft.	\$0.70	\$0.60
4 to 5 ft.80	.70

CHAMPION. Tree strong grower; produces a good crop every year. Fruit is large and of good quality. Late.

BOURGEAT. Large, golden yellow, fine quality. Ripens soon after Orange.

ORANGE. Good size. Heavy bearer. Flesh yellow. October.

ABUNDANCE. (Asiatic.) Fruit very large and showy; flesh light yellow, exceedingly juicy, tender and sweet. A good market variety. Ripens the first of August.

BURBANK. (Asiatic.) Fruit very large; dark violet-red; flesh juicy and pleasant. Ripens middle of August. Productive.

GREEN GAGE. Skin pale green. Excellent. An old standard variety. September.

GERMAN PRUNE. Dark purple or blue; juicy, rich, of best quality. September.

RED JUNE. (Asiatic.) Ripens first of August. Fruit large, red; flesh light lemon-yellow, half cling, slightly sub-acid and of good quality. Very productive.

ITALIAN PRUNE. (Fellenberg.) Flesh juicy and delicious. Dark purple with a dark blue bloom; medium size. September.

SHROPSHIRE DAMSON. Medium size fruit, produced in thick clusters or groups. Tree a strong grower and very productive of dark purple-colored plums. October.

BRADSHAW. Trees grow large and are well formed; bear regularly and heavily. Fruit large, light purplish red, changing to dark reddish at maturity. August.

Hansen Bush Cherry

The New Quick-Bearing Cherry
Easy to Grow

Here is a new tree that grows in dwarf-like shape, rarely getting over 6 feet tall. Excellent for hedges or ornamental shrubs; beautiful in spring flower. Fruit is dark red, about the size of a large cherry and comes in clusters. Price: 2-yr. plants, 2-3 ft., 50c each; 10 or more at 40c each.

Apricot Trees--Hardy

*Confidently !
it's BARTLETT
in PEARS*

**Unexcelled for Canning, Pickling
and Eating—It is the All-Around
Favorite Pear**

Bartlett, the standard on all markets. Large, rich golden yellow with red blush; juicy, melting, with rich indescribable flavor that has made it the most popular flavored pear. An old favorite.

Clapp's Favorite

Summer. Fruit large, lemon color, spotted with brown dots; flesh fine, rich and sweet. A very good one. Early August.

Kieffer

Rich Golden Yellow—Widely Planted

Prolific. Abundant and regular bearer. Good shipper. Fruit large, color yellow with red cheek. Will produce ten bushels of pears to the tree when ten years old; begins fruiting successfully when three years old. October.

Seckel

For Pickling

Medium size, skin rich yellowish brown with deep brownish red cheek when fully ripe; flesh very fine grained, sweet, exceedingly juicy, melting, buttery. One of the richest and highest flavored Pears known. Sept.

Sweet September Cherry

(Plant Pat. No. 94)

The amazing new fall-bearing Cherry. Produces deliciously sweet cherries, medium dark red, large size fruit, which ripen about September 1st. The young trees start bearing the second or third year after planting, and continue producing heavy crops thereafter. **Strong, 3-4 ft. trees, \$1.40 each; \$13.50 per 10.**

The New Extra Hardy Manchurian Apricot

Put them on your "must" list. Particularly outstanding because of their ability to thrive and bear fruit almost anywhere in the U. S. A., thus extending the present Apricot belt to the Canadian border and even beyond. Have withstood temperatures of 50 below zero. Very drought resistant. They bear early, almost always in one or two years after planting. Fruit is of good size, freestone, good flavor. **Strong two-year trees, 50c each; \$4.50 per 10.**

FRESH FROM YOUR GARDEN EVERY YEAR

ASPARAGUS

ABUNDANT VITAMIN CONTENT

MARY WASHINGTON

The Blue-Blood of the Asparagus World. Extra heavy crowns, long fat roots, strong, giant size, green color. Bunting-grown.

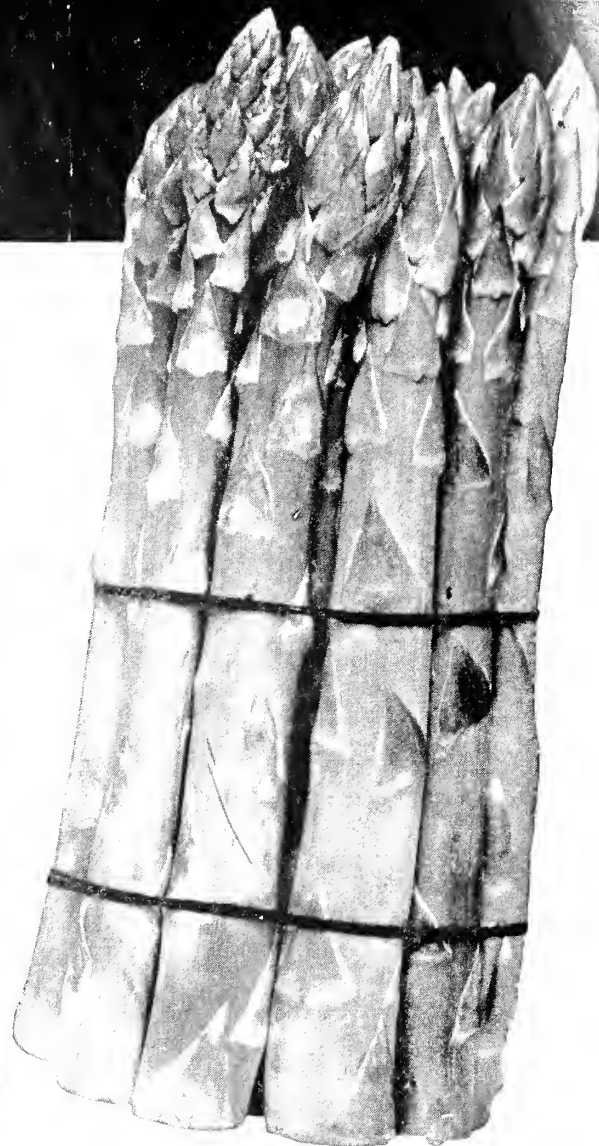

Originated by the U. S. Department of Agriculture and for years considered the best variety of Asparagus grown. All of the commercial growers are planting Washington exclusively. Very strong grower, stock of giant size, green color, rich and tender. It is our opinion that the two principal good points of this variety are, that it is rust-resistant, also a stronger grower than any of the old standards of Asparagus.

	25	100	1000
Prices: 3 yr., No. 1	\$0.85	\$2.00	\$12.00
2 yr., No. 165	1.50	7.50
1 yr., No. 150	1.10	6.00

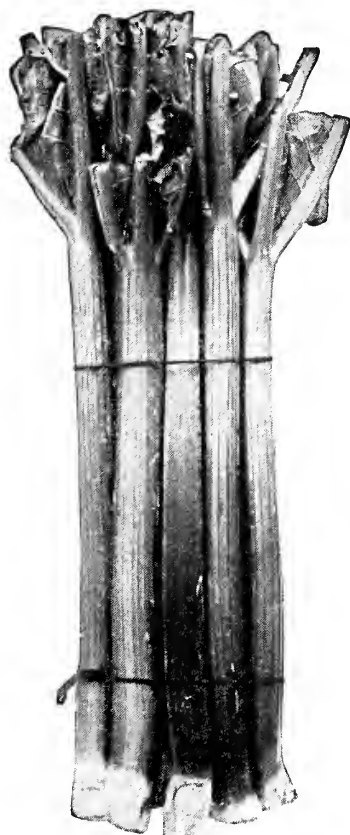

We are the largest growers of Asparagus plants in America. The seed from which our plants are grown is selected from a pedigreed field; it is hand-picked from the sturdiest stalks in the field, assuring you of the best strain of Asparagus possible when you buy Buntings' plants. WRITE FOR SPECIAL PRICES ON LARGE LOTS.

We can also furnish Barr's Mammoth, Conover's Colossal, Giant Argenteuil, Martha Washington, Palmetto and Pedigreed Washington Asparagus roots at the above prices.

See page 22 for information on distances for planting all kinds of trees and plants. Complete planting and cultural directions will be included free with each order.

"Grow Your Own"

Rhubarb

Horseradish

MALINER KREN. Very hardy, and thrives best in cool, moist earth, but will thrive well on any soil that produces crops of any kind. Plants are vigorous, and roots grow to a large size. Price, 1-yr., No. 1 plants: 10 for 50c; 25 for \$1.00; 100 for \$3.00.

Rhubarb or Pieplant

MYATT'S LINNAEUS. Early, large, tender and good quality. Price, 2-yr. No. 1 plants: 10c each; 10 for 75c; 100 for \$5.00; 1000 for \$40.00. 1-yr., No. 1 plants, 7c each; 10 for 50c; 100 for \$3.00; 1000 for \$20.00.

Nut Trees

Nut trees are valuable, useful and ornamental. No home should be without them. They are valuable as shade and ornamental trees, as well as for the nuts they produce.

	Each
Black Walnut, 6-8 feet	\$2.00
English Walnut, 3-4 feet, grafted	3.00
English Walnut, 4-5 feet, grafted	4.00
Japan Walnut, 4-5 feet	2.00
Pecan, 5-6 feet, grafted	2.00

BUNTINGS' Grafted Nut Trees Produce Nuts In Two to Three Years After Planting

BLACK WALNUT. Widely known, very hardy. Trees grow to an immense size and bear heavy crops regularly. Nuts very delicious.

ENGLISH WALNUT. A fine, lofty growing tree with handsome spreading head. Very hardy, will stand extreme cold. Produces abundantly.

JAPAN WALNUT. Very hardy, makes quick growth, bears abundantly when young, produces large nuts.

PECAN. Strong grower. Very large, thin-shelled nuts, easily opened.

The Mammoth BOYSENBERRY • 1½" Long 1" Wide

25 Plants for \$1.65

The biggest berry ever developed. Its size is unbelievable—two inches long is not unusual, three inches long not rare. Fifty of these plump, inch-thick marvels will fill a quart basket; a sight so remarkable people can't resist buying them! They are rare—they are unusual. The demand is so tremendous retailers can't get enough of such perfect fruit.

A cross between the California Loganberry, Raspberry, and Blackberry. Just think of a berry that has a little of each of these fruits all in one giant, nearly seedless, beautiful wine-colored berry, with a flavor that you will never forget. Get in on this wide-open market and make money.

Buntings' hardy No. 1 strong-rooted plants bear big crops the second year, tremendous yields from then on. You can save on every plant you buy from Buntings'.

Profitable to Grow. Whether you are growing berries for market or just a few in your garden, it will pay you to get started right now.

Twenty-five plants will produce an abundance of fruit for the average family. Six hundred plants will set an acre, set 8 ft. by 8 ft.

Boysenberry, No. 1 strong-rooted plants, 10 for 80c; 25 for \$1.65; 50 for \$2.90; 100 for \$5.25; 1000 for \$40.00.

Fifty Boysenberries Often Fill a Quart Box

Blueberries

BIG DELUXE GARDEN VARIETY CULTIVATED EASY TO GROW

10 One-Year Plants for \$2.50

		3 to 9	10 to 30
	Each Plants		Plants
1 yr., 3-6"	\$0.40	\$0.30	\$0.25
2 yr., 4-12"	.60	.50	.40
2 yr., 12-18"	.75	.65	.55
3 yr., 18-24"	1.25	1.00	.90

There is a big market for these delicious Blueberries; they make money from any type of acid soil. Grow in big clusters—3000 to 5000 quarts per acre—easy to harvest, thornless. Established plants last a lifetime, give bigger yields every year.

If your soil is sweet, use peat moss or partially rotted vegetable matter around the plants to create acid. The period of ripening covers several weeks; therefore harvesting can be done at leisure. Write the U. S. Dept. of Agriculture, Washington, D. C., for a free bulletin on Blueberry culture.

Your choice of **Cabot**, early; **Pioneer**, midseason; **Rubel**, late. Use two or more varieties to cross-pollenate for best results.

BLACK BERRIES • HARDY VIGOROUS DEPENDABLE

Increase your profit! One acre of blackberries will average 800 to 2000 quarts, and prices on this fruit are always high. Plant Blackberries along trenches and the lot lines, and turn waste garden space into profit. Excellent for home and market use.

Blackberry prices, No. 1 plants: 10 for 60c; 25 for \$1.10; 100 for \$3.25; 1000 for \$20.00.

FIELD CULTURE

Plant in rows 7 feet apart with plants set 4 feet apart in the rows (1,555 plants to set an acre at given distances).

Plow a furrow about 5 or 6 inches deep or dig holes 6 inches deep and 6 inches square. Spread roots, fill hole with soil; firm well. Cut stock after planting approximately 2 inches above ground level. Let them grow and the following spring cut the new growth back one-third, leaving two-thirds of the season's growth for production of berries. After they have fruited cut all fruiting canes out and burn them. Cultivate occasionally and follow same procedure each year, allowing about 6 to 10 canes on each plant to stand for fruiting each season.

BLOWERS. Buntings' plants are the heaviest fruiting and best Blackberries in the world. Very hardy, the berries are sweet and delicious, jet black color, good shippers, ripen in July.

ELDORADO. Another fine quality Blackberry. Plants are vigorous and seldom fail to produce a bumper crop. Commercial growers like their shipping qualities.

Currants - Gooseberries

CURRENTS

FAY'S PROLIFIC. A very vigorous growing bush, enormously productive, with fruits of very large size. Inclined to do better on light soils than most varieties. Popular with most growers, but not as upright a grower as Wilder. 2-yr., No. 1 plants, 35c each; 10 for \$3.00; 100 for \$25.00.

WILDER. A vigorous, upright growing bush. Very hardy and productive. This variety is possibly more largely grown than any other kind in cultivation. It was highly commended by that great Currant authority, the late S. D. Willard, of Geneva, N. Y. Berries medium to large, dark glossy red; skin thin, tender; flesh juicy, firm, exceedingly good; late midseason. 2-yr., No. 1 plants, 35c each; 10 for \$3.00; 100 for \$25.00.

GOOSEBERRIES

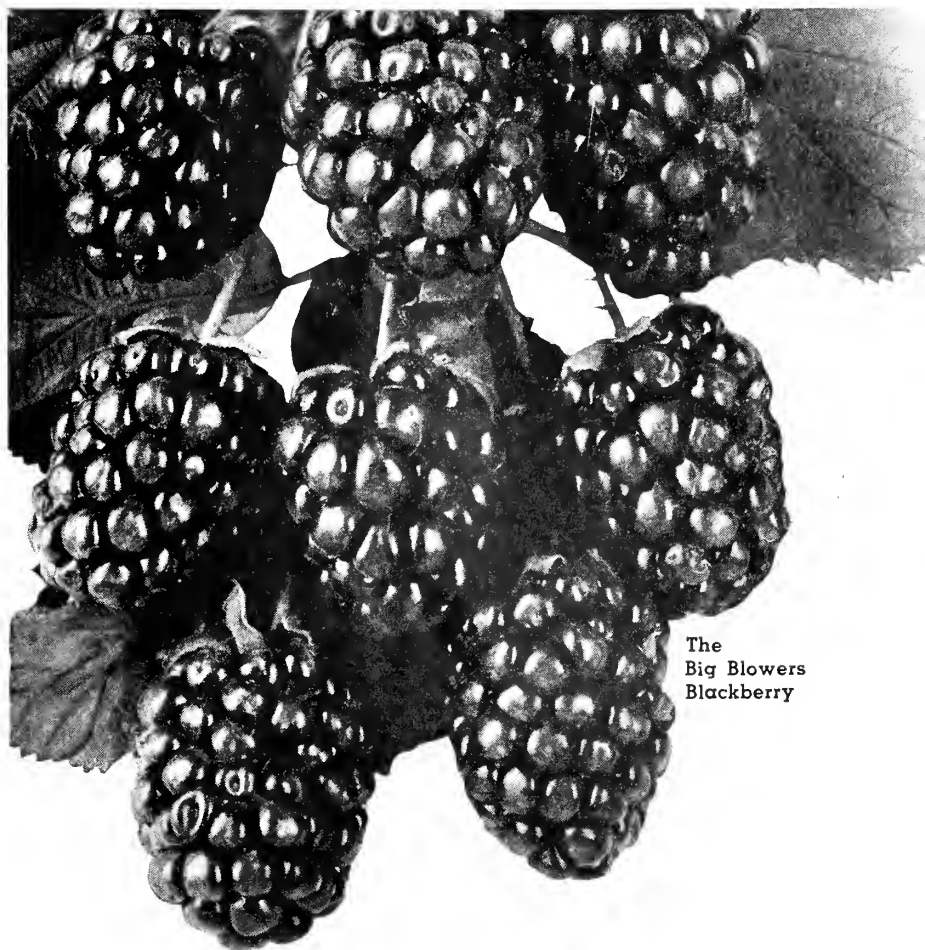

DOWNING. One of the old reliable varieties. Fruit is quite large, pale green in color, and of splendid quality. Bushes are vigorous growers. Midseason.

HOUGHTON. This variety rarely fails to produce a crop every year. The berries are of medium size, sweet and tender, and the plants are extremely hardy and healthy.

Price, 2-yr., No. 1 plants, 35c each; 10 for \$3.00; 100 for \$25.00.

23 States Require Permit

Under provisions of the White Pine Blister-Rust Quarantine, it is unlawful for anyone to send Currants or Gooseberries into 23 States of the Union without first securing a special permit from the State Department of Agriculture where the shipment is to be made. Therefore, please do not request "rush" shipments on orders for these plants, as it sometimes requires ten days to secure a permit.

The Big Blowers Blackberry

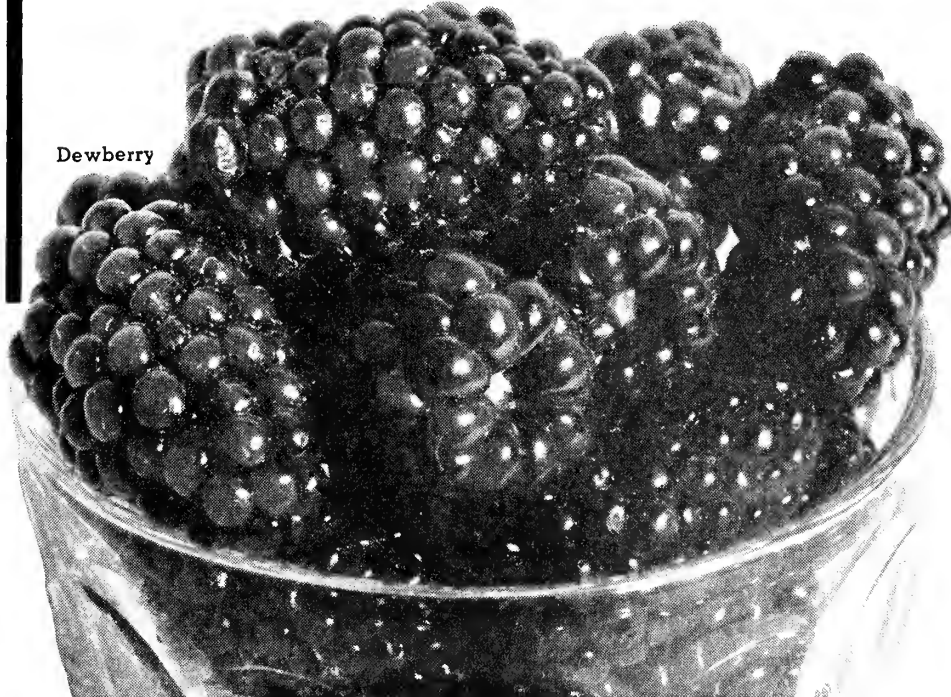

DEWBERRIES

Produced on a trailing vine, does best when supported on a wire. Berries extra large, long glittery black. Big profits when grown commercially. Hardy and disease resistant, early ripening varieties. Order now and plant on time. Buntings' guaranteed nursery stock conforms to all standards of the American Association of nurserymen.

AUSTIN. Ripens before Lucretia. A valuable variety for table use. Fruit very large.

LUCRETIA. Extremely productive. Berries extra large, black in color; flavor rich, sweet and delicious.

Dewberry prices, No. 1 plants: 10 for 55c; 25 for \$1.00; 100 for \$2.75; 1000 for \$14.95.

Dewberry

Latham Raspberries

HOW TO GROW RASPBERRIES SUCCESSFULLY

CULTURAL DIRECTIONS—RED RASPBERRIES

Two methods of culture are commonly used, the hill system and the solid row system. Under the first system plants are usually set five feet apart each way while under the second system they are set three feet apart in rows seven feet apart. Place plants in hole or furrow, spread roots, fill to ground level, and press soil firmly. After planting, cut all canes back to 2 or 3 inches above the ground level. The following spring, before growth starts, prune canes back to a length of about three feet. After fruiting season cut out all fruiting canes and burn them to destroy any disease or insects. Future year's growth should be confined to six or eight strong canes to each plant, following same procedure year after year.

BUNTINGS' *Hardy*

SPLENDID WELL-ROOTED PLANTS—

A Local Market—No Outside Competition

You can make money with raspberries because their delicate flavor won't keep, and the berries can't be shipped long distances. This gives you all the Local Market, with little competition from outsiders—and a chance to sell on a quality basis alone. Raspberries usually sell from 18c to 25c a pint, often bring from \$800 to \$1000 per acre. For early summer cash the farmers are finding that Raspberries always find a ready sale and readily sell on the fruit stands.

Plant Buntings' Well-Developed Raspberry Bushes That Are Noted For Their Splendid Root Systems.

Latham

**Is All Meat—
Not All Seeds**

Latham is free from insects and diseases and multiplies rapidly. In the northwest, the great berry-growing section of America, growers are more enthusiastic over Latham and are planting it heavily each year. The most popular mid-season to late red Raspberry grown today. Very hardy; cold weather seems to have no effect on its bearing ability. Very large size, fine color; they start ripening in midseason and continue an unbelievably long time. Plants are vigorous growers; mosaic free.

**Ripens Ahead
of Latham**

Newburgh

(Red.) Midseason. A new variety introduced by the New York Fruit Testing Association. Plant vigorous grower, branching more than most red varieties. Hardy, very productive. Fruit very large, firm. Does not crumble. Precedes Latham a few days in ripening. An excellent shipper and keeper.

CHIEF. (Red.) Ripens ten days earlier than Latham. Very hardy, can be grown successfully in cold climates. Fruit is firm and of fine flavor. Unusually healthy and vigorous. Chief is mosaic-proof and will not take on mildew.

TAYLOR. This new red Raspberry promises to be the best of them all for New York and the northern states. The plants are vigorous, hardy, productive, tall growing, and increase rapidly. Sturdy canes hold the berries well off the ground. The berries ripen shortly before Latham, are large, long-conic, bright attractive red, thick-fleshed, firm, sub-acid, and of excellent quality.

ST. REGIS EVERBEARER. Ripens with the earliest and continues on young canes until autumn. Color red; flesh firm and meaty. Largely planted.

RED - BLACK Raspberries

EXTRA FINE TOPS—FREE BRANCHING CANES

Cultural Directions

Black Raspberries

Two methods of culture are commonly used, the hill system and the solid row system. Under the first system plants are usually set 6 feet apart each way while under the second system they are set 4 feet apart in rows 7 feet apart. Place plants in hole or furrow; spread roots, fill to ground level, and press soil firmly. After planting cut all canes back to 2 or 3 inches above the ground level. When new growth starts and has attained a height of 18 to 24 inches, it is best to pinch the tips of the canes which causes each cane to throw off branches and grow upright. All lateral branches should be cut back severely, leaving from 6 to 8 inches of cane. Weak spindling canes are cut out entirely. The following spring before growth starts prune canes back to a length of about 3 feet. Cultivate raspberries shallow during the entire season but do not continue beyond picking season, as late growth will not mature sufficiently to withstand the winter.

CUMBERLAND

Strong Sturdy Canes (Black)

In blacks—your best bet. Produces large, jet black fruit, firm and of excellent quality; sweet and mild, ripening in midseason and continuing for 2 weeks. Extensively planted for commercial purposes and for table use.

Sodus Purple

A cross between a Red and Black Raspberry. Heaviest yielding and the most promising new large purple Raspberry. Sodus withstands drought and heat; comes through with a crop under adverse weather conditions. Does not crumble. Very large, attractive purple berries, of good quality. Canners prefer them over either red or black sorts.

Indian Summer

—*Red Giant Everbearer*

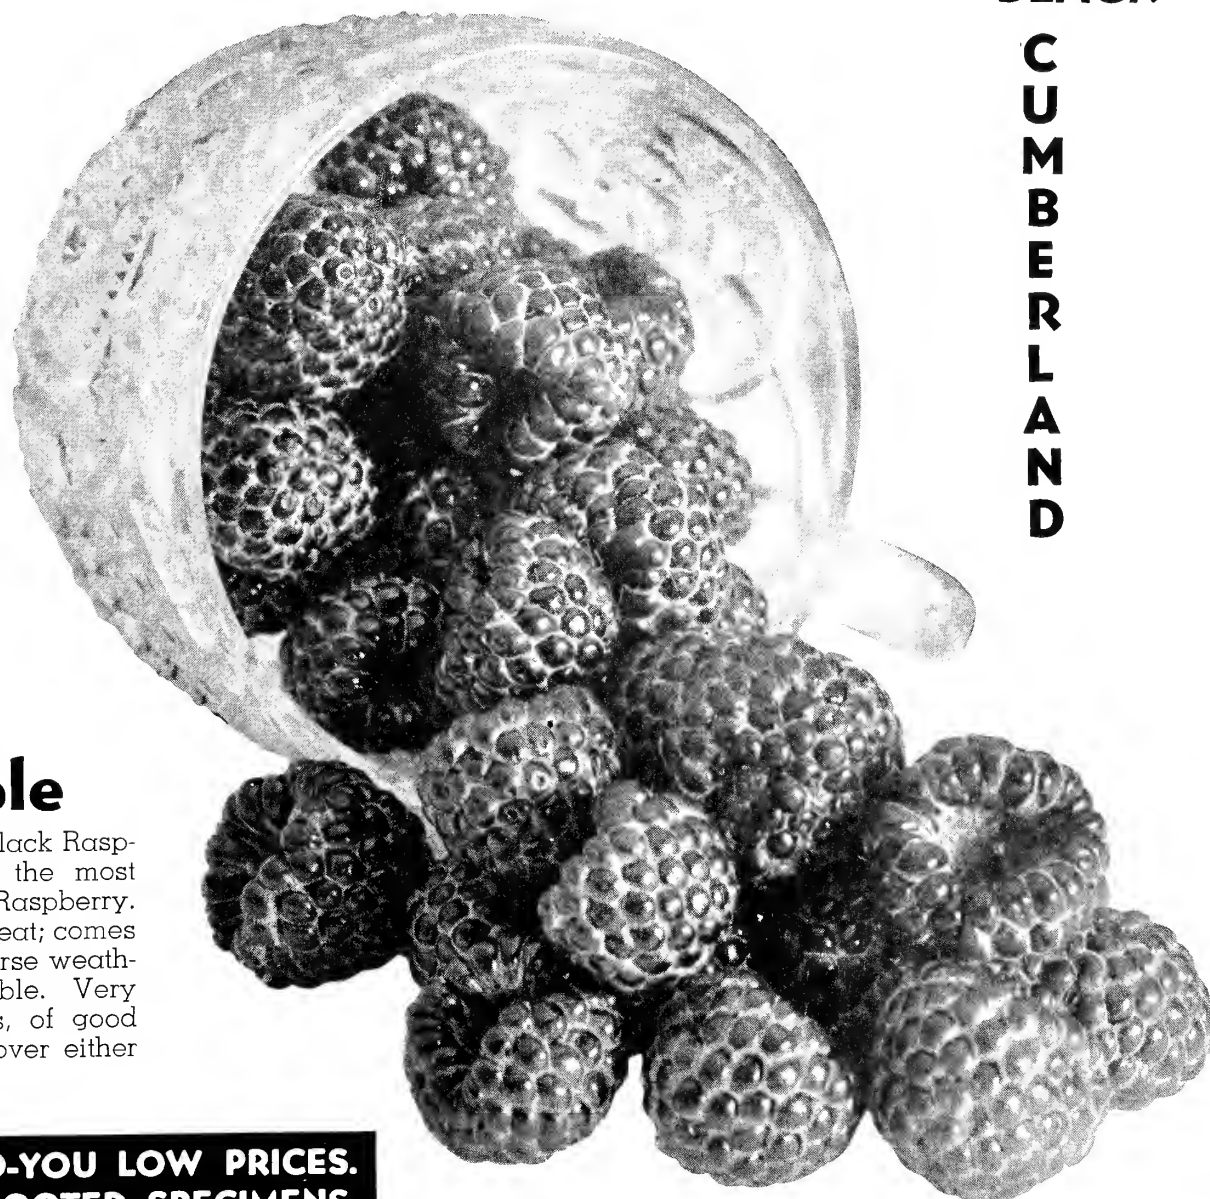

The best Everbearing Red Raspberry. Earliest to ripen; bears a full crop in June and an immense crop in the fall. A sensation because of its size, flavor, and unusual beauty. Wonderful keeping qualities. Berries are glossy red, conical in shape, and of extra large size. The greatest all-purpose Raspberry. The fall crops, when Raspberries are scarce and therefore highly prized, are heavier than the earlier ones.

Buntings' Hardy Grapes

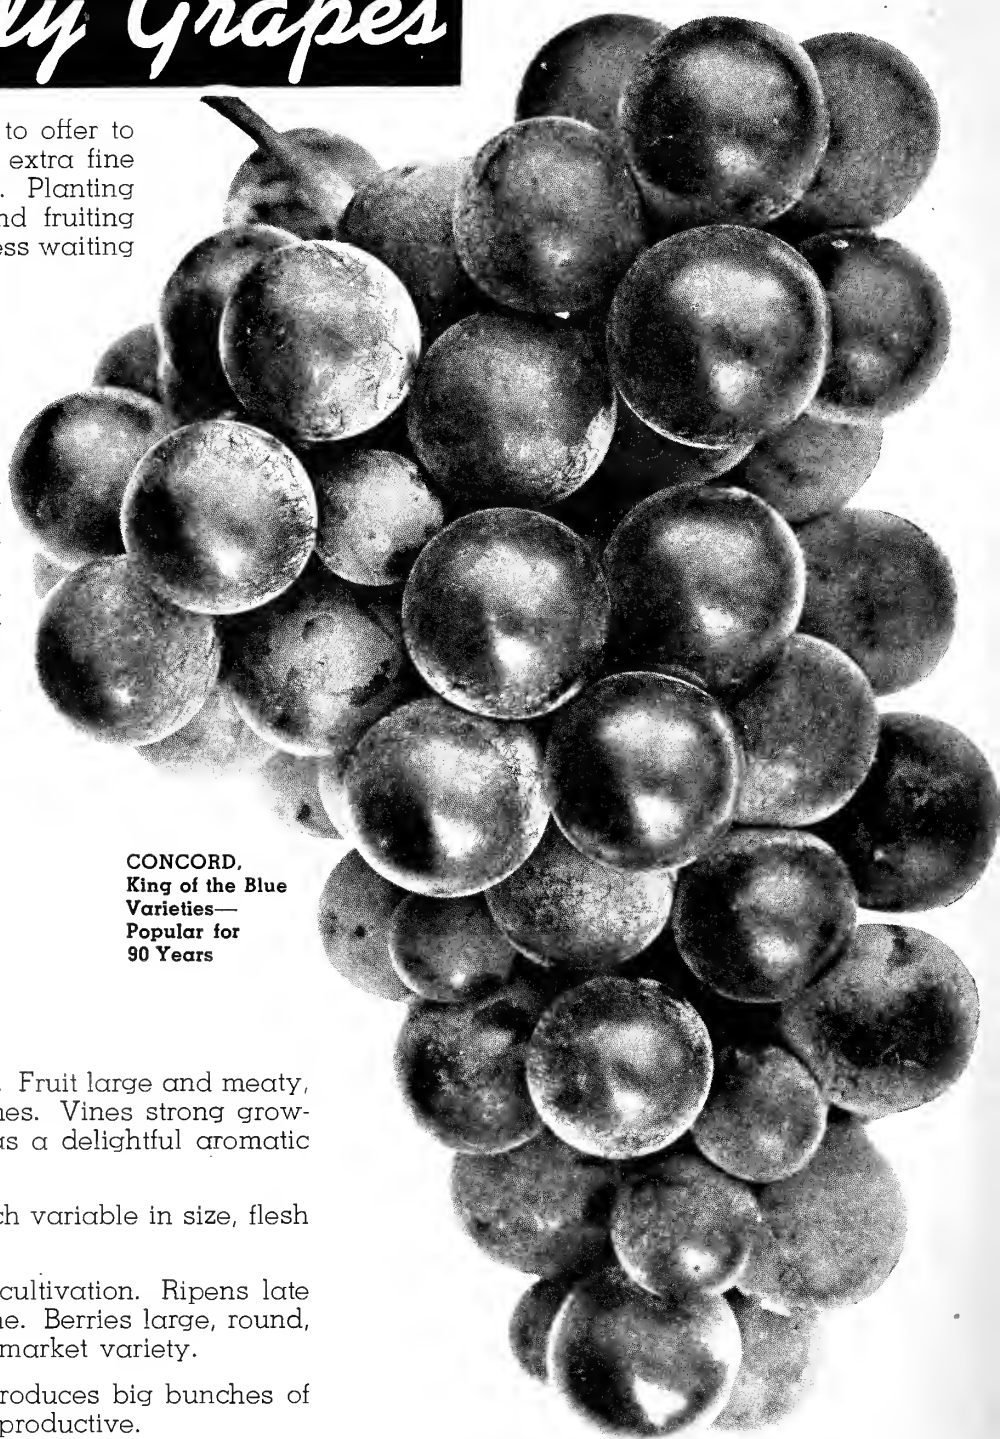

We are exceedingly fortunate in being able to offer to our patrons this spring very low prices on our extra fine long-rooted grape vines, for immediate results. Planting these vines, with their heavy root systems and fruiting canes of three to five feet long, saves you needless waiting for them to develop.

CONCORD

A Universal Favorite for 90 Years

Discovered about 90 years ago. Apparently a seedling of a wild grape. It early established the record of being the "grape for the millions"—the KING of the grape family. It is still the best all-around grape. Its adaptability to varying climatic conditions alone makes it popular, to say nothing of what can be made of its fruit, such as sweet grape juice, jellies, jam, marmalades, etc.

Concord is a very vigorous grower, hardy and very productive. Ripens midseason and known as the best money-making commercial variety; also, for home use, it is unsurpassed by any other variety.

CONCORD,
King of the Blue
Varieties—
Popular for
90 Years

AGAWAM. Deep red or maroon. Ripens early. Fruit large and meaty, borne in extra large, loose-shouldered bunches. Vines strong growers, very healthy. Ripens with Concord. Has a delightful aromatic flavor.

BRIGHTON. One of the best red varieties; bunch variable in size, flesh tender and juicy, red; early.

CATAWBA. Keeps better than any Grape in cultivation. Ripens late and can be kept in good condition a long time. Berries large, round, when fully ripe dark copper colored. Good market variety.

CHAMPAGNE. The Champagne grape vine produces big bunches of sweet, amber-colored fruit. Very hardy and productive.

DELAWARE. Early. Vine moderately healthy and vigorous. Bunch small but compact, berries small to medium in size, red in color and of excellent flavor.

FREDONIA. Black, with heavy bloom, cluster about medium, berry large, very early, good quality; new and very promising.

GREEN MOUNTAIN. Fruit yellowish white. About the earliest and most reliable of well-known white varieties for the North.

MOORE'S EARLY. Ripens before Concord. Color of grapes deep black. Large and of best quality. Bunches hold together firmly. One of the best shippers. A profitable variety for either home use or market. Makes excellent wine. Very productive. Like Concord and Worden produces abundantly in nursery row on two-year-old vines.

MOORE'S DIAMOND. White. Ripens early September. Berries medium size, and desirable for grape juice. Good quality fruit.

PORTLAND. White, very early, cluster medium large, berry good quality. Very hardy, vigorous grower, productive. New and very promising.

WORDEN. Vine moderate grower, very hardy and productive. Grapes very large, thin skin, very fine flavor, blue-black in color and fine for home use or nearby market. One of the earliest, ripening about 10 days before Concord. Fruits heavily on young vines.

**A small sum invested in vigorous Bunting-grown vines
turns your idle land into fruitfulness and value**

Grapes Popular Tested Varieties

Grapes can be grown on many types of soil from light blow sand to heavy clay. They can be grown on hillsides, along boundary lines, or on arbors and trellises.

Buntings' offer only strong one- and two-year-old plants, grown in our own nurseries at Selbyville.

Plant Buntings' high-quality vines and be ahead of success. Plant eight to ten feet apart. Shipped direct from our nurseries to you.

NIAGARA A Quality White Grape

Was first fruited in 1868. Concord is one of its parents. It received practically all of its characteristics from this parent. Niagara, therefore, is Queen of the grape family. Where well grown, its bunch, berry and coloring cannot be surpassed in beauty. It has been and still is the standard white table grape of eastern United States. It does not easily crack. Consequently it makes a very good appearance on the market, inducing larger sales. The fruit of Niagara is at its best when left on the vines until well ripened. **Niagara is a worthy Queen of King Concord.**

CACO The Best Red

This is a variety considered the best and hardiest amber-red ever produced, the bunches being very large and the berries comparable with the new Fredonia.

In quality Caco ranks among the best of native grapes, approaching in flavor European Muscat rather than the foxiness of native grapes.

For three of the best varieties we recommend Concord, dark blue-black; Niagara, white; and Caco, red.

BUNTING GROWN *they are HARDY*

TIPS on Distance to Plant - - Number per Acre for Small and Large Fruits, Asparagus, Etc.

Distance for Planting—Square Method

Distances for planting different kinds of fruit trees, etc., square method:

Peach. 20 feet apart each way.
Standard Apple. 35 feet apart each way.
Cherry, Sour. 18 feet apart each way.
Cherry, Sweet. 20 feet apart each way.
Standard Pear. 20 feet apart each way.
Plum. 20 feet apart each way.
Grape Vines. Rows 8 feet apart, 8 feet apart in row.
Currants and Gooseberries. Rows 4 feet apart, 4 feet apart in row.
Blackberries. Rows 6 feet apart, 6 feet apart in row.
Black Raspberries. Rows 7 feet apart, 4 feet apart in row.
Red Raspberries. Rows 7 feet apart, 3 feet apart in row.
Dewberries. Rows 4 feet apart, 5 feet apart in row.
Strawberries, Field Culture. Rows 4 feet apart, 1½ feet apart in row.
Strawberries, Garden Culture. Rows 2 feet apart, 1 foot apart in row.
Asparagus, in Field. Rows 5 feet apart, 2 feet apart in row.
Asparagus, in Beds. Rows 1½ feet apart, 1 foot apart in row.

Rules for Other Distances

Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to an acre.

Number of Trees Required to Set an Acre at Various Distances

	Trees per Acre
Trees planted 35 feet apart each way	35
Trees planted 30 feet apart each way	49
Trees planted 25 feet apart each way	69
Trees planted 20 feet apart each way	109
Trees planted 18 feet apart each way	137
Trees planted 16 feet apart each way	170
Trees planted 14 feet apart each way	222
Trees planted 12 feet apart each way	302
Trees planted 10 feet apart each way	435
Trees planted 8 feet apart each way	680
Trees planted 6 feet apart each way	1,210
Trees planted 4 feet apart each way	2,722

Number of Plants Required to Set an Acre at Various Distances

1 x 1 ft.	43,560	4 x 2 ft.	5,445
2 x 2 ft.	10,890	5 x 1 ft.	8,712
3 x 1 ft.	14,520	5 x 2 ft.	4,356
3 x 1½ ft.	9,900	6 x 1 ft.	7,260
3 x 2 ft.	7,260	6 x 2 ft.	3,630
4 x 1 ft.	10,890	7 x 1 ft.	6,222
4 x 1½ ft.	7,260	7 x 2 ft.	3,111

Growing Strawberries Profitably

Planting Time

Northern States—April and early May.

Central States—March and April.

Southern States—February and March.

Each year we are surprised that so many people think you can postpone setting Strawberry plants during spring months, expecting to make up lost time by setting them in summer or early fall; it cannot be done successfully. Early spring is the ideal time to set Strawberry plants, as soon as the weather permits preparing the ground. In the southern states, we recommend February and March; in the central states, March and April; in the northern states, April, or as early in May as possible. Place your order early so as to allow ample time for material to reach you at the time you wish to plant. You realize it requires time for your order to reach the nursery after it has been placed in the mails, and while we are thoroughly organized to handle all business promptly, we have adverse weather conditions, etc., which hold up digging and packing of plants. Under ordinary conditions, however, plants are shipped in two or three days after your order is received.

Type of Soil

For best results, select a plot springy in nature but well drained and free of vegetation. Strawberry plants are not like trees. They are small and do not root deeply in the soil. Moisture is essential. Should you have a plot of land which you contemplate setting to Strawberries, keep the crop as free from vegetation as possible during the previous year. If the land has been lying idle, plow late in the summer before the weeds and grass develop seed to maturity. This will eliminate crop of weeds and grass the next season. Heavy crops of Cow Peas, Soy Beans, or any other, if plowed under in late summer while green, increases the humus and fertility of the soil, making it loose and porous; therefore, the more retentive of moisture.

Soil Preparation and Fertilization

Prepare soil same as for truck or garden crops. Lay out rows, usually 3 feet 6 inches to 4 feet apart; set plants about 15 to 18 inches apart in the rows. Do not use commercial fertilizer at the roots. Ground animal bone, thoroughly mixed with the soil, is fine to use at the roots. It should be placed in bottom of furrow before row is made up. Spreading good barnyard manure on the land before plowing is preferable to ground

animal bone. If soil is fertile, we do not recommend using any type of fertilizer when planting.

During January, February or very early March (January or February preferred), apply a good grade of commercial fertilizer carrying an analysis of 5 per cent ammonia, 6 to 8 per cent phosphoric acid and 10 per cent potash, broadcast on the row of plants at the rate of 15 to 20 pounds per hundred yards of row space. This is all the plant food necessary to reap a bumper crop of good quality fruit.

Setting Plants

Clip the roots if they can't be planted without doubling. Some varieties naturally grow larger than others, and require slight clipping before being transplanted. The plant should be set with the crown about even with the soil after it has been thoroughly firmed around the plant.

Cultivation

Keep Rows Free of Vegetation

As soon as the plants are set in the spring, cultivation should begin and should be continued whenever weeds start or a crust forms. Frequent shallow cultivation will make it unnecessary to do much hand hoeing or hand weeding. The cultivator, which merely loosens the top soil without breaking the roots, is to be preferred. Any weeds which interfere with the development of plants or fruit during the picking season are pulled by hand or cut off with sharp hoes. Tests have shown that Strawberry fields which receive frequent hoeing and cultivation made larger, stronger fruiting beds and produced a better crop of berries.

There is much that could be said about the culture of Strawberries. Different types of soil in different locations make it almost impossible to give any definite set rule.

Mulching

After the first freeze during fall months, wheat or rye straw, or marsh grass, may be applied over the rows of plants for winter protection. Early in the spring, before growth starts, it should be removed from the plants and placed between the rows. By this time it has served its first purpose, protection of the plants during the cold winter weather. When placed between the rows, it retains moisture, and prevents particles of sand or earth from spattering the berries, insuring the berries being clean when placed on the market.

LEADERSHIP

in fine Big Rooted STRAWBERRY PLANTS

AMBROSIA

Ambrosia is Buntings' Recommendation for a bumper crop of late berries. Considered to be the latest, largest and best late Strawberry ever introduced.

Prove to your own satisfaction that this late-bearing berry is a worthy companion to our other leaders, viz.: Dorsett, Fairfax, Premier, Blakemore, Catskill, Chesapeake and Big Joe. Berries are very large, semi-pointed. Rich sparkling bright red, delicious flavor. Ripens 3 weeks later than Premier, when other strawberries are gone. Is self-pollenizing and extremely hardy. Fruit stems are very rigid and often attain a height of 6 inches. Berries develop in the shade of the leaves and off the ground which makes clean fruit.

ABERDEEN. (Perfect.) A strong, vigorous grower, foliage dark green to bluish in color. Fruit of fair quality, somewhat acid, little better than the average berry in size. Aberdeen ripens in midseason.

A partial view of a field of Buntings' Strawberry plants growing on the grounds of one of our customers.

Ambrosia Berries

AROMA. (Perfect.) Late. One of the best late varieties; plants are large, very vigorous and healthy. Fruit is large, bright glossy red, of excellent carrying quality, and one of the most productive late varieties.

BEAVER. (Perfect.) Extra early. A cross of Dr. Burrill and Premier. A heavy yielder like Premier. Berries solid, medium to large and of good quality.

BELLMAR. (Perfect.) Originated by the U. S. Department of Agriculture. A cross between Missionary and Howard 17 (Premier) made in 1923 at the U. S. Plant Field Station near Glen Dale, Maryland. Foliage resembles Howard 17 very much and about the same in production of plants. Fruit is of a combination Premier-Missionary type, colored darker than Premier and somewhat lighter than Missionary. A good one.

BIG LATE. (Imperfect.) Late. Vigorous grower, very productive. Fine quality. Berries very large, rich in color, with a handsome bright green cap that increases the beauty and selling price of the berries.

BRANDYWINE. (Perfect.) Medium late. Fruit large and very firm, good shipping qualities, a very heavy cropper. More extensively planted in the tropical climates.

BUBACH. (Perfect.) This is one of the old-time favorites. Plants make a good growth; foliage dark green, leathery type; produces an abundance of big red berries of medium firmness.

See page 30 for prices.

15 Million Golden-Rooted Bay-Shore Grown Strawberry Plants for Buntings' Strawberry Customers in 1941

Our Strawberry plants are shipped to all Strawberry sections of the United States and many foreign countries, and doing an excellent job of producing profitable crops of berries for all.

Strawberry Plants

CLERMONT. A cross between Premier and Marshall, made by the New York Experimental Station, that is gaining much popularity in the northern states. Fruit light glossy, with a bright green cap; good quality and flavor.

A cross between Premier and Dunlap, which retains the rich color and flavor together with the larger size of Premier. Particularly successful in the north; it stands up well in dry weather and makes a good fruiting bed under other conditions.

A cross between Missionary and Fairfax. Preferred for cold-packing and for the home garden berry for the southeast; attractive, good flavor, grows well; leaves are large and deep green.

See page 30 for prices.

REASONS WHY

Identical Rooted Strawberry Plants Excel in Quality

is why Buntings' golden rooted Strawberry plants are among the

best have here ideal soil and climatic conditions to produce heavily rooted fruit buds, and this is very important.

- 2 Only those soils particularly suited to Strawberry plant growth are selected for their production.
- 3 Very careful attention is paid to the planting stock. Plants of known merit are selected to produce the stock plants.
- 4 The plants at digging time are very carefully dug, graded, tied in bundles of 26 for 25, packed with sufficient damp moss around their roots, in ventilated crates, to reach you in excellent condition, and at the time you are ready to do your planting.

Each operation in the production of our Strawberry plants is personally supervised by Mr. Norman Bunting, who devotes all his time to this phase of the business.

Select varieties that are adapted to your section and soil, give them proper care and you will have a crop of berries to market that you will be proud of, and which will pay you handsome profits.

100 GEM. Everbearing.

500

Heavily Rooted Plants For
\$3.50

that withstands long hauls—maintaining its color and firmness.

We recommend it to our commercial and home-garden friends as a good profit berry.

SIZE. The berries are large and hold their size well to end of season.

QUALITY. Unsurpassed in quality among the midseason and late strawberries.

FIRMNESS. The berries are always firm and excellent to ship long distances.

GROWTH. Chesapeake requires land that is well-fertilized, and frequent hoeing is necessary for best results.

PROFIT. If good fertile land is used, and frequent care is given, you will never have to worry about the money you will get for the crop.

DORSETT

**Its Bright Red Color and Rich,
Delicious Flavor Always Bring
Top Market Prices**

Ripening early, with Premier and Blakemore, this variety has rapidly come to the top in favor. Originated in 1923 by the U. S. Dept. of Agriculture, introduced in 1934, Dorsett is now well known and widely planted in all strawberry sections of the United States. In this latitude it does exceptionally well. Very resistant to leaf spot diseases. Its flavor is mild sub-acid, sweet and very pleasing. The fruit is usually conic in shape, bright red in color, somewhat firmer than Premier but not as firm as Fairfax.

For prices, see page 30.

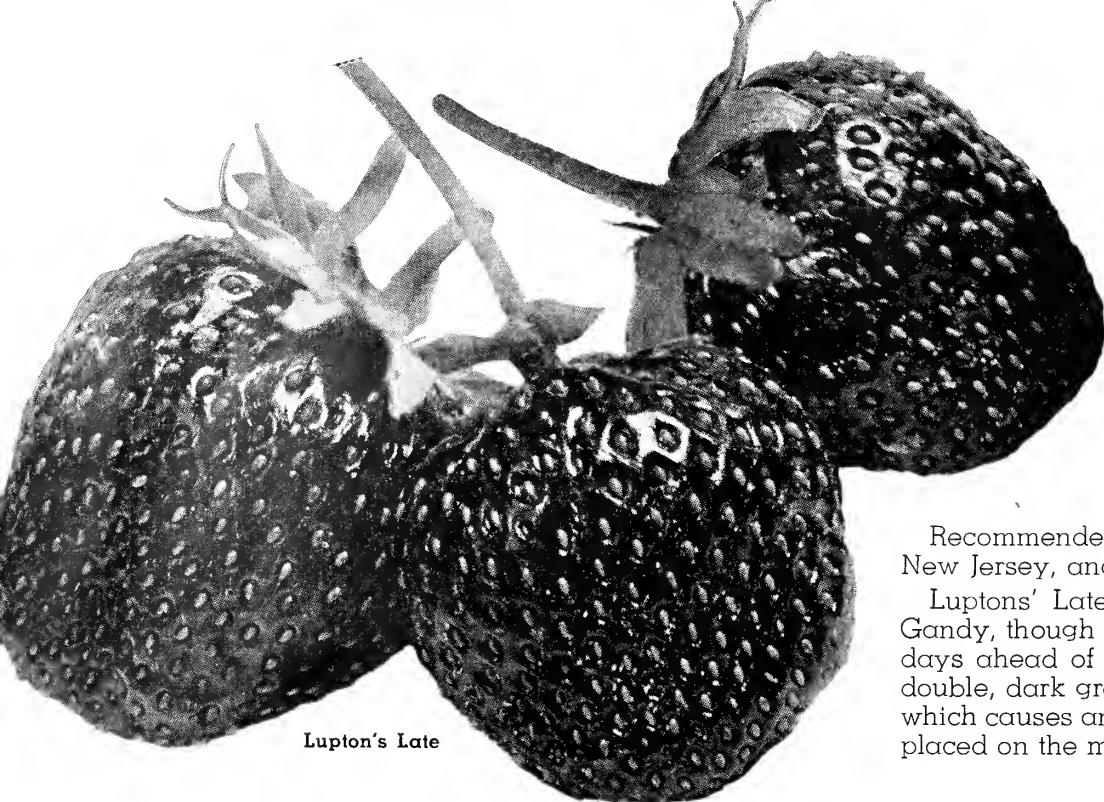

CATSKILL

**An Outstanding Midseason Variety,
Becoming More Popular Every Year**

Originated in 1934, from a cross between Premier and Marshall. Produces large, strong plants; makes an ideal fruiting bed. The berries are large in size, bright red color. Equals Premier in flavor and carries a bright green cap. Firm enough to arrive on the market in excellent condition. It is considered almost frost-proof, and can be depended upon to produce annually bumper crops of fruit. That's the story on Catskill.

For prices see page 30.

Lupton's Late

Lupton's LATE STRAWBERRY

Recommended for Pennsylvania, Maryland, Delaware, New Jersey, and New York States.

Luptons' Late (perfect), in many respects is quite like Gandy, though far more prolific, comes into bearing a few days ahead of Gandy. Berries large, bluntly conical; its double, dark green cap sets the fruit off wonderfully well, which causes an immediate lasting demand for them when placed on the market. Unexcelled shipping qualities.

See page 30 for prices.

FAIRMORE. Another new introduction by the U. S. Department of Agriculture. Originated as a cross between Blakemore and Fairfax, made in 1933 by Dr. George M. Darrow. The plants are very large, the leaves also being large and a dark, glossy green. The fruit is very uniform in shape, being even more uniform than Fairfax. Starts ripening with Blakemore. Very productive of glossy crimson fruit, carrying a large and attractive cap. The skin is tough, flesh firm, and under some conditions even more firm than Fairfax. Its flavor is sub-acid and ranks high in dessert qualities.

FROSTPROOF. (Perfect.) A new variety. Plants large, thrifty, tall and deep rooted. Fruit large, good color, shaped much like Dunlap. Of good quality and extra firm.

GANDY. (Perfect.) This is an excellent late variety. Does best in springy land with some clay in its makeup. Fruit is large, firm, and of fine flavor. A good long distance shipper. The perfect shape of the berries and the large, bright green caps make them very beautiful and attractive.

GLEN MARY. (Perfect.) Very popular throughout the northern half of the United States and especially in Pennsylvania, New York and New England. Firm enough for distant shipping. The fruit is of large size and dark red in color with prominent seeds of bright yellow.

HEBRON. A leading new late variety developed by the Connecticut Agricultural Experimental Station. Fruit very firm, attractive in color and general appearance; heavy yielder. A good strong grower. Does well on a great variety of soils. We unhesitatingly recommend to any commercial grower a heavy planting of Hebron for a money crop.

KLONDYKE. (Perfect.) Berries uniform in shape and size, dark red, mild and delicious; very handsome. Plants make a remarkable growth, are tall and compact, stalks strong, leaves light green. One of the paying early varieties. Recommended for the South and Pacific Coast states.

HOWARD 17. This variety is the same as Premier. One of the best early varieties.

LUCKY STRIKE. (Perfect.) A fairly heavy bearer; berries of good quality and appearance; not a very vigorous grower. One of the best everbearing varieties on the market.

LATE GIANT. (Perfect.) Berries are dark red all the way through and honey-sweet, firm and of extra good quality. Heavy cropper. Ripens about the middle of June.

BUNTINGS' Leadership • Finest Strains Full Crowns, Golden-Rooted Plants

MARSHALL. (Imperfect.) Fruit extremely large, bright red. Plants large, healthy, bright green in color; not as prolific as some other varieties but size of berries makes the baskets easy to fill.

MASTODON. (Perfect.) The most extensively planted variety of ever-bearing strawberry plants at this time. Fruit is very large, of waxy appearance. Plants also very large and healthy. Foliage dark, glossy green, and produces fruit throughout the entire summer and fall months. See back cover page for photograph of this popular variety in color.

MISSIONARY. (Perfect.) A good early variety. At least 95 per cent of the strawberries grown in the state of Florida are Missionary. A strong grower and productive. The berries are well colored and firm.

NARCISSA. (Perfect.) Released in 1933 by the U. S. Department of Agriculture. Has the same parentage as Dorsett and Fairfax, being a seedling of Howard 17 and Royal Sovereign. Berries bright color, firm, attractive, good quality.

NEW YORK. (Perfect.) Midseason. Plants are large and healthy. Fruit extremely large, well colored. A good midseason variety for the northern states.

NORTH STAR. A fine new variety, recently released for introduction by the U. S. Department of Agriculture. A medium early, firm, commercial and home-garden variety of high quality. The plants are above average in size.

PARSONS' BEAUTY. (Perfect.) Midseason. Fruit is large, conical, uniform in shape, dark red, and fair quality. A strong pollinizer.

RED GOLD. (Perfect.) Early. Ripens earlier than Premier. Brilliant red berries with tender flesh and sweet, melting flavor.

RIDGELY. (Perfect.) A cross between Premier and Gandy. Ripens early midseason. Fruit firm, large size.

SAMPLE. (Imperfect.) Medium late. Extensively planted throughout the entire northern states. Fruit is large and well made up, firm enough for long distance shipments.

SHELTON. Originated at the Connecticut Agricultural Experimental Station, and particularly recommended for the northern states. The fruit is bright red, of fine quality and flavor. Vigorous grower, making an abundance of new plants.

Senator Dunlap

(Dr. Burrill)

The Old Dependable

One of the oldest midseason varieties and still grown on a large scale in all parts of the country.

Dunlap grows on all soils, under most adverse conditions, in localities where late frosts make it impossible to grow other sorts, and always makes a heavy fruiting row and produces a record yield of fine fruit.

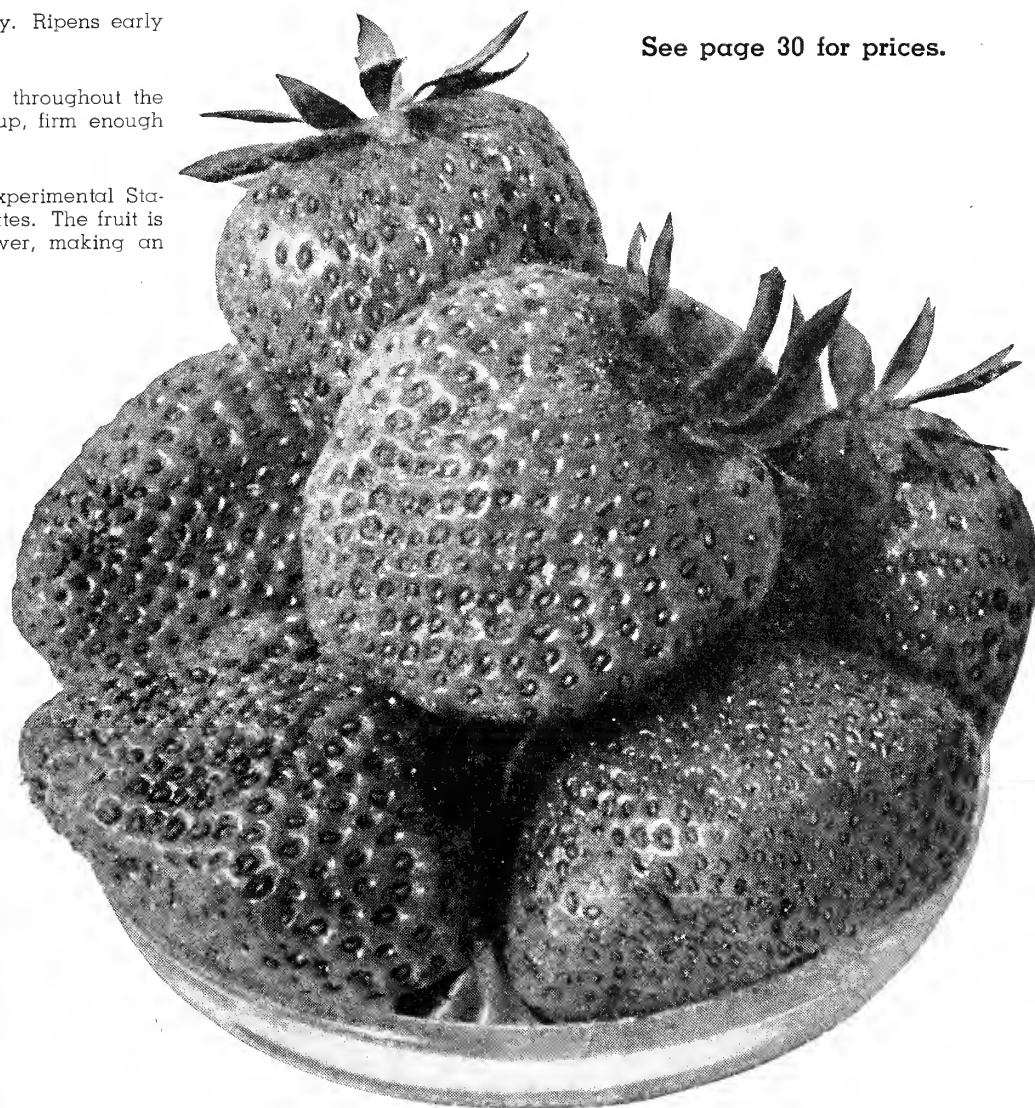

Fruit is of good size and a beautiful bright red color, glossy and very firm. It is a splendid shipper and of excellent quality when grown in the regions adapted to it.

SOUTHLAND. Large, firm berries, very fine quality. Plants make a healthy, vigorous growth. Particularly recommended for the southern states.

WM. BELT. (Perfect.) Midseason to late. Produces a large berry of extraordinary beauty and quality.

WAYZATA. Berries are extra large in size, very dark red, with a much better flavor than that of the other fall-bearers. The fruit is quite firm and very attractive. A very poor plant-maker; seldom does the mother plant produce more than one or two runners a season. For this reason, the plants will always sell at a premium. Due to this habit of growth, the plants should be set rather close in the row, which will result in your obtaining a large crop of berries from a small area. Wayzata comes into bearing earlier in the summer than the other fall-bearers; a very prolific bearer.

See page 30 for prices.

PATHFINDER

A BUNTING RECOMMENDATION
PROPAGATED FROM ORIGINAL
STRAIN

A cross between Premier and Aberdeen; originated and introduced by the New Jersey State Experimental Station. Now quite popular in several Strawberry sections where it has been grown. Starts ripening a few days after Premier, and the first two pickings are exceptionally heavy, with the berries medium to large in size and of very good appearance. Ripens at a time to bring good prices, when there is a demand for large solid berries. Foliage is a dark thrifty green, holding up well during the fruiting season. The plants make a vigorous, healthy growth, and are disease-resistant. Try Pathfinder this year.

Thanks to DR. GEORGE M. DARROW
DEPARTMENT OF AGRICULTURE

The NEW

Fairfax and
Chesapeake
Parentage

STARBRIGHT

BUNTING says "The Best Originated"

Far exceeding the well-known Dorsett and Fairfax."

The new Starbright is very similar to Fairfax, a little brighter red, and quality resembles its varied parentage—Fairfax and Chesapeake.

This new creation of Dr. Darrow of the U. S. Dept. of Agriculture is a medium early variety with long fruiting season. It continues to produce extra large berries, uniform in size, until at least one-half the crop of late varieties has been harvested. Exactly like the illustration. Immensely productive, unexcelled shipping qualities. Strong grower, leathery, dark glossy green foliage.

Because this new variety is so outstanding, we recommend a good sized patch, and satisfy yourselves as to the outstanding qualities of this new introduction. Frankly speaking, we are this spring for commercial fruiting purposes planting more Starbright than all other varieties combined. That's how much we think of Starbright.

See page 30 for prices.

FAIRFAX

The
Quality Berry

A Favorite In Quality, Flavor and Productiveness—a Bunting Recommendation

Originated and introduced with Dorsett; now widely known and planted. Far superior to all other varieties we know of in quality, and for home garden or local markets it cannot be beat. Fairfax has a tendency to become dark when over-ripe (although it remains solid and full flavored), and for this reason the berries should be kept picked as they ripen. The berries are exceptionally large all through the fruiting season, and very firm. Starts ripening about two days after Dorsett, and fruiting season covers a long period. The plants are large and vigorous. Plant Fairfax for its superb flavor, large size and universal demand.

PREMIER BIG JOE

BLAKEMORE

There is something of the inborn qualities of each of these three varieties—tried, tested, and grown commercially for many years—the element of "gamble" does not exist.

Good fibrous-rooted plants with well-formed "crowns,"

purchased from a recognized strawberry plant grower is your best assurance of a profitable strawberry crop.

Buntings' golden rooted strawberries are sold to all the important growers of the country who specialize in the commercial field. Fifteen million plants will leave our nurseries this year with our assurance that successful profit will be enjoyed.

PREMIER NO CROP FAILURES

Always a Heavy Yields, Frost-Proof—An Excellent Variety For Northern Regions

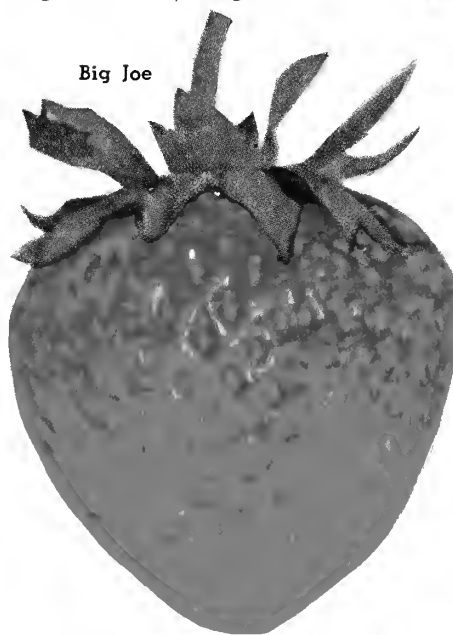

This ever-popular berry has stood the test for 25 years. Fruit large, and holds its size well throughout ripening season. Foliage smooth, bright and clean. A good plant maker. One of the most extensively planted early varieties of strawberries at this time. A perfect flowering, early ripening variety.

There are but very few varieties that have equalled Premier's production record. In flavor and quality it ranks with the best. **Recommended for home use, local sales or commercial markets.**

See page 30 for prices.

Blakemore

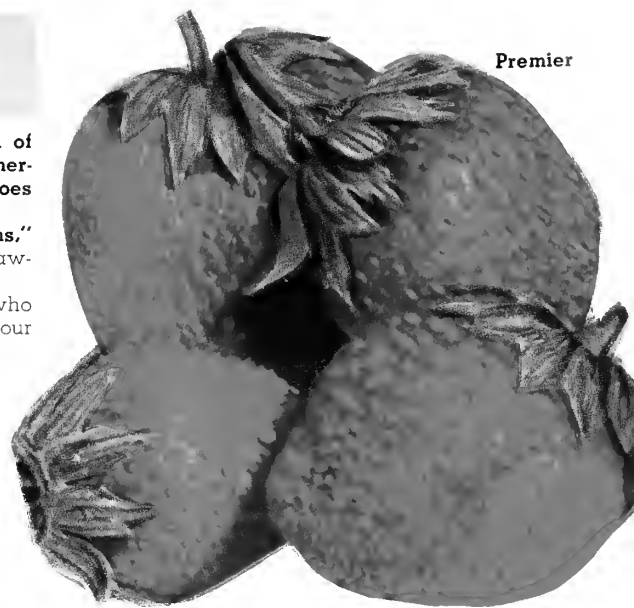

Big Joe

BLAKEMORE

The Ideal Early Shipping Berry—We Offer a Special Strain of Blakemore, Free From Yellows

A healthy plant that yields big crops of berries—a factor worthy of note. Will stand two or three days without over-ripening. Foliage is healthy and stands up well during drought. Fruit is firm, of good color and unexcelled as a long-distance shipping berry. Ranks high in productivity. To get all that you are entitled to from Blakemore, do not allow them to mat too thick in the rows during the growing season.

Premier

BIG JOE

(Perfect.) Midseason. Ripens about three days before Gandy. Fruit is firm and of large size, good color and of a delicious flavor; no green tips, wonderfully productive; plants are strong growers and thrive on any soil that will produce Strawberries. Excellent shipping qualities.

Plant New Varieties!

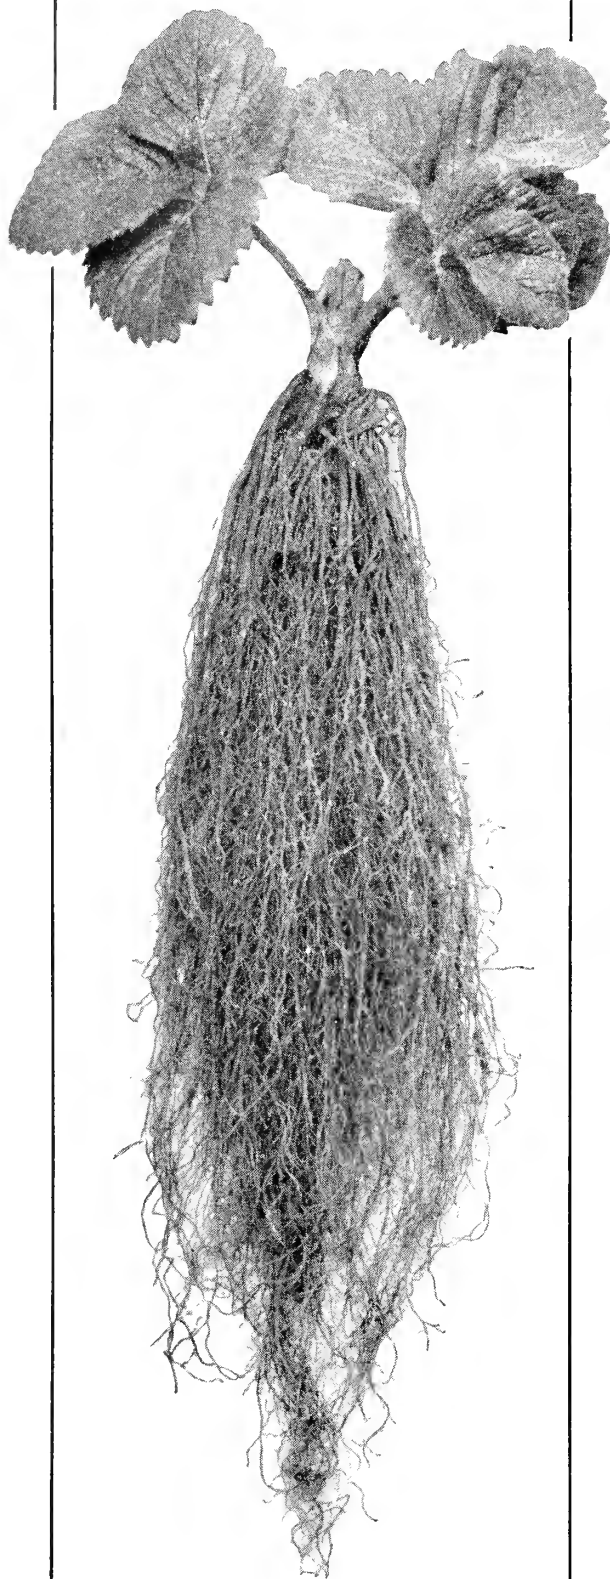

That Have Been Tried and Tested—Avoid Freaks or Advertised Novelties

While we have the highest regard for new varieties of proven merit, we have learned from long experience that all too often, by use of attractive pictures and high sounding, often exaggerated descriptions, many varieties have been sold at high prices, only to prove a bitter disappointment to those who bought them. When any really worth-while new varieties appear like Dorsett, Fairfax, Starbright and Catskill, we follow them closely, and when we feel that we can safely and conscientiously recommend them we do so. All new varieties that are highly recommended by us, we know are good.

QUALITY is Never Sacrificed for Low Price

SELECT
Grade

Fine, hardy, two-year-old, nursery-grown, everblooming rose bushes. Bunting Roses are budded on strong, healthy rootstock to promote vigorous growth. Rootstocks have been grown in the nursery one year before being budded.

McGredy's Scarlet

AUTUMN. Most extraordinary colored rosebud—burnt orange—on strong stems for cutting. Foliage glossy and very dark green.

BETTY UPRICHARD. (Hybrid Tea.) Deep toned carmine with coppery orange blend; interior mostly delicate salmon-pink. Very choice.

BRIARCLIFF. Handsome flowers of silvery rose-pink.

DAME EDITH HELEN. (Hybrid Tea.) Largest, most perfectly shaped and most perfumed pink Rose. Clear, glowing pink, from the time the bud opens until the petals fall. Blooms abundantly, with long, strong stems. Growth of bush is vigorous and thoroughly hardy. Wins praise and admiration everywhere.

DUCHESS OF LUXEMBOURG. Rich golden yellow.

DUCHESS OF WELLINGTON. Large, well-formed buds, opening to semi-double saffron-yellow flowers, stained with crimson and changing to lighter yellow.

EDITOR McFARLAND. Long pointed pink bud with a glow of amber and a paler edge. Fine for cutting.

E. G. HILL. Great, massive blooms of deep maroon, velvety on inside, very fragrant.

ETOILE DE FRANCE. Well-formed buds that develop into full open flowers of red and soft velvety crimson, shading to vivid cerise.

ETOILE DE HOLLANDE. (Hybrid Tea.) Large, velvety crimson flowers produced in great profusion throughout the summer. Deliciously perfumed. Vigorous, upright grower. Unquestionably a popular and excellent red Rose.

GRUSS AN TEPLITZ. (Hybrid Tea.) Bright scarlet, shading to velvety crimson; fragrant; free flowering.

JOANNA HILL. (Hybrid Tea.) Extremely large, very long-pointed; flowers large, semi-double, full, unusually lasting, moderately fragrant, darker yellow than Sunburst, borne singly on long, strong stems. Beautiful foliage; few thorns. Vigorous grower; profuse bloomer.

J. J. L. MOCK. Silvery rose-white, reverse of petals carmine-pink.

K. A. VICTORIA. Most popular of all white Hybrid Tea Roses. Flowers large and finely formed, borne singly on strong upright stems.

KILLARNEY PINK. Fine satiny pink. Perfectly hardy, robust grower. A constant bloomer.

KILLARNEY WHITE. Same habits and fragrance as Killarney Pink.

Prices—all varieties listed on pages 32 and 33.

A ROSE

all will Bloom this Summer

by any
other name
would smell
as sweet

LADY ASHTOWN. Very pale solid carmine-pink; yellow base. Blooms are large, globular and well formed.

LOS ANGELES. Flame-pink. Buds long and pointed. Beautiful from the opening of the bud until the last petal drops.

MARGARET McGREDY. One of the most popular Red Roses. Almost always in bloom; a thrifty, vigorous grower.

MEV. G. A. VAN ROSSEM. Brownish yellow flowers, strongly shaded with copper-pink.

MME. CAROLINE TESTOUT. Broad petals of satiny rose, rounded flower, shaded darker at center and lighter edges.

MME. BUTTERFLY. Harmony of bright pink, apricot and gold. Richly perfumed.

MME. EDOUARD HERRIOT. Color coral-red; a free blooming variety; producing fine flowers all summer and until frost.

MISS ROWENA THOM. (Hybrid Tea.) Large buds open to full blooms of perfect form, often measuring over 5 inches in diameter. The color is deep rose-pink with a yellow base to the petals which lights up the whole flower. Vigorous grower, splendid foliage, and blooms freely. Delicious fragrance.

MRS. AARON WARD. Dark yellow, almost orange. A beautiful variety.

MRS. E. P. THOM. Clear, deep canary-yellow.

MRS. PIERRE S. DU PONT. (Hybrid Tea.) This Gold Medal winner has a medium-sized long-pointed bud of a reddish gold, opening to a semi-double, cupped, very lasting fragrant flower of a deep golden yellow. The plant is strong and vigorous.

PINK RADIANCE. (Hybrid Tea.) Extra hardy, vigorous and prolific. Blending of carmine-rose with shades of opal and copper.

PRES. HERBERT HOOVER. Vivid cerise-rose, softly suffused with yellow. Always in bloom.

RED RADIANCE. (Hybrid Tea.) Large, globular flowers of an even, clear red. Constantly in bloom. Very popular.

REV. F. PAGE-ROBERTS. Copper-red buds unfolding to beautiful golden blooms.

ROSLYN. Full golden yellow bloom, deeper in center, with orange splashings on back of petals.

SOUV. DE CLAUDIUS PERNET. (Pernetiana.) Most satisfactory yellow Rose.

Strong sunflower-yellow, even deeper toned at center. Large flowers; buds long and pointed. Vigorous growing bush, with brilliant foliage.

SOUV. DE GEORGES PERNET. Brick-red, magnificent blooms.

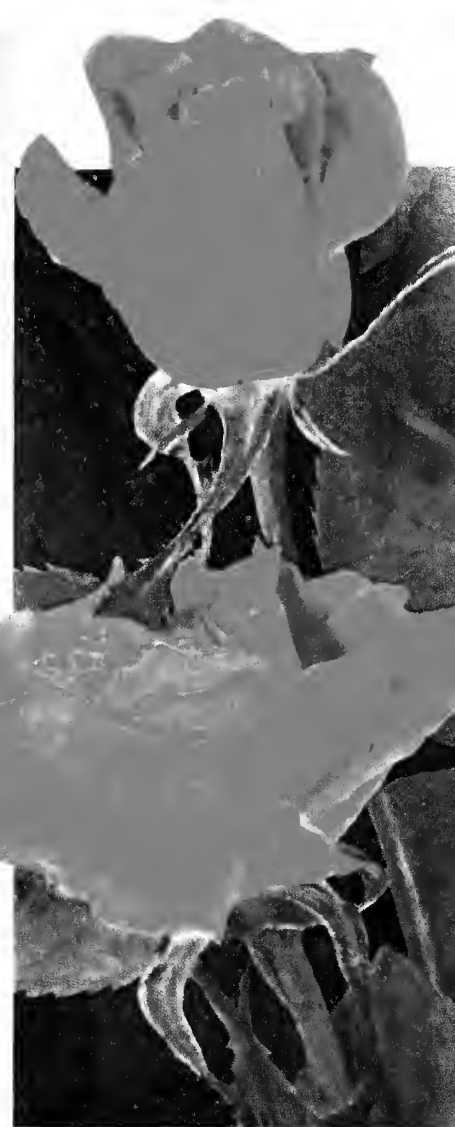

SUNBURST. Golden yellow with yellow-orange center. A good variety.

SYRACUSE. A new Rose, outstanding in the brilliance of its bright crimson hue.

TALISMAN. A multi-color rose of orange, yellow and rose-red. Fragrant—a gold medal winner.

WILLOWMERE. Brilliant pink flowers suffused with a golden light.

See page 32 for prices.

Lovely Gardens Abound in Roses

Climbing and Pillar Roses

We list below the finest and most popular climbing Roses. All plants are healthy and selected from virile stock.

- AMERICAN PILLAR.** Carmine-crimson, white eye.
CLIMBING AMERICAN BEAUTY. Deep rose-pink; fragrant.
CLIMBING TALISMAN. A climbing form of the Talisman Hybrid Tea.
CLIMBING CLAUDIUS PERNET. Clear deep yellow.
DOROTHY PERKINS. Large, pink clusters.
DR. W. VAN FLEET. Pale pink; very popular.
GARDENIA. Nankeen-yellow.
MME. GREGOIRE STAECHELIN. Pearl-pink petals; fragrant.
PAUL'S SCARLET. Blazing red; popular.
SILVER MOON. White, streaked yellow.

Price: 2-year plants, select grade, 50c each; 10 for \$4.25; 100 for \$35.00.

4 PATENTED HYBRID ROSES

- BLAZE.** (Plant Patent No. 10.) The only hardy everblooming scarlet climber. **Each, \$1.00.**
COUNTESS VANDAL. (Plant Patent No. 38.) The sensation of the shows. Lovely coppery pink and gold, extra long pointed buds. The Queen of the Garden. **Each, \$1.00.**
ECLIPSE. (Plant Patent No. 172.) The long, stream-lined bud, enhanced by ornamental sepals, is of rich gold without shading. The international sensation, awarded prizes in Rome, Paris, and other test gardens. **Each, \$1.25.**
RADIANT BEAUTY. (Plant Patent No. 97.) A hardy, vigorous grower. The color is a peculiar red, with petals of an unusual eggshell finish; opens to a perfect rose in all weather. **Each, \$1.00.**

Honeysuckle

Vines NATURE'S DRAPERIES THAT CLING AND CLIMB

- BITTERSWEET** (*Celastrus scandens*). Attractive light green foliage and yellow flowers during June. **Price, strong, 2-year vines, each, 30c; 10 for \$2.50.**
BOSTON IVY (*Ampelopsis Veitchii*). Grows very dense. Foliage green and very healthy. **Price, 2-yr. vines, each, 40c; 10 for \$3.50.**
CLEMATIS PANICULATA. Flowers snow-white during entire summer and autumn. **Price, 2-yr. vines, each, 35c; 10 for \$3.00.**
CLEMATIS, LARGE FLOWERED. Very popular. Profusion of large flowers during summer and autumn. Varieties: **Andre**, red; **Henryi**, white; **Jackmani**, purple; **Ramona**, blue. **Price, 2-yr. vines, 60c each; 10 for \$5.50.**
ENGLISH IVY (*Hedera helix*). Foliage rich waxy green during entire winter. **Price, 2-yr. vines, each, 40c; 10 for \$3.50.**
HALL'S JAPAN HONEYSUCKLE. White flowers from May until November. **Price, 2-yr. vines, each, 35c; 10 for \$3.00.**
GOLDFLAME HONEYSUCKLE. Blooms all summer. Showy tubular flowers, flame-red outside, bright yellow inside, borne in clusters. Delightfully fragrant. **2-yr. vines, 75c each; \$7.00 per 10.**
SILVER LACE VINE (*Polygonum Auberti*). Very fragrant white flowers during the month of September. **Price, 2-yr. vines, each, 50c; 10 for \$4.50.**
TRUMPET VINE (*Bignonia radicans*). Orange flowers in midsummer. **Price, 2-yr. vines, each, 30c; 10 for \$2.50.**
WISTERIA. Blooms in great profusion during spring. Fine for porches and trellises. Colors: white and purple. **Price, 2-yr. vines, each, 50c; 10 for \$4.50.**

Bunting-Grown BARBERRY and PRIVET HEDGING

2,000,000 HEDGING PLANTS ARE GROWN BY BUNTINGS' EACH YEAR — THEY ARE AMERICA'S FINEST

JAPANESE BARBERRY

Probably so well known it needs little description. Dark green leaves which turn to red and yellow in fall. Thorny bush, which makes good hedge or specimen plants. Graceful, drooping branches are loaded late in summer with bright red berries which hang on most of the winter.

BUNTINGS' *fine* FLOWERING SHRUBS

BLOOM from APRIL to LATE FALL

**PRICES ALL VARIETIES FLOWERING SHRUBS LISTED
ON THIS PAGE (Unless otherwise stated) :**

1 1/2 to 2 ft. size, 35c each; \$3.00 per 10.

2 to 3 ft. size, 45c each; \$4.00 per 10.

ALMOND (*Prunus Glandulosa*). One of the most popular flowering shrubs. Low bush with arching branches. Blooms early spring. Your choice of pink or white. **Prices: 18 to 24 in., 45c each; \$4.00 per 10. 2 to 3 ft., 55c each; \$5.00 per 10.**

ALTHEA, ROSE OF SHARON. Upright, very hardy. Begins blooming in early summer and continues through the autumn months. Colors: Red, white, pink and blue.

RED-LEAVED BARBERRY. Same as the popular, well-known, hardy-as-an-oak, Greenleaf Barberry, except the foliage is deep red in the spring and deep purple during the summer months. Popular for planting in clumps, hedges, as well as in foundation plantings. **Price: 9 to 12 in., 25c each; \$2.25 per 10. 12 to 15 in., 30c each; 10 for \$2.75.**

BEAUTYBUSH (*Kolkwitzia Amabilis*). A beautiful shrub covered in early May with small pink flowers on drooping branches. **Price: 18 to 24 in., 50c each; 10 for \$4.50. 2 to 3 ft., 70c each; 10 for \$6.50.**

BUTTERFLY BUSH, Farquhar. Vigorous and easy to grow. Blooms from August to the end of autumn. Lilac-colored blooms, fragrant, attracting beevies of butterflies.

BUTTERFLY BUSH, Charming. A glorious new shrub bearing throughout the late summer and autumn elegant long sprays covered with lovely lavender-pink blooms. **Price: 18 to 24 in., 50c each; \$4.50 per 10. 2 to 3 ft., 60c each; \$5.50 per 10.**

CRAPE MYRTLE. A strong growing shrub, adapting itself to almost any soil and condition except in the northern sections where the temperature often drops below zero. Does very well in latitudes south of Philadelphia. Leaves are bright green; the blooms are large panicles of crinkled little flowers of brilliant hues. Blooms late July and August. **Price: 2- to 3-ft. plants, 80c each; 10 for \$7.50.**

DEUTZIA, PRIDE OF ROCHESTER. Blooms in May; large double flowers which are white with the outer petals tinted pink. Free bloomer. **Price: 2- to 3-ft. plants, 35c each; 10 for \$3.00. 3- to 4-ft. plants, 45c each; 10 for \$4.00.**

DEUTZIA, SLENDER. Of dense, bushy, dwarf habit. Festoons of pure white flowers in May. **Price: 12 to 15 in., 30c each; 10 for \$2.50. 15 to 18 in., 40c each; 10 for \$3.50.**

BLOOD-TWIG DOGWOOD (*Cornus Albus Sibirica*). Bright cherry-red stems in winter; creamy white flowers.

GOLDEN TWIGGED DOGWOOD (*Cornus Stolonifera Lutea*). Very striking yellow branches in winter, and forms a good contrast when planted with the red stem sorts.

GOLDEN BELL (*Forsythia*). One of the best early blooming shrubs. Rich golden flowers in early April. Vigorous grower.

HYDRANGEA, HILLS OF SNOW (*Hydrangea A. G.*). Known for its profusion of round snow-white blooms which appear early in July and last until late September. Very hardy. **Price: 18 to 24 in., 40c each; \$3.50 per 10. 2 to 3 ft., 60c each; \$5.50 per 10.**

JAPANESE QUINCE (*Cydonia Japonica*). In early spring this shrub is a-dazzle with scarlet flowers, which are later succeeded by quincelike fragrant fruits which can be used for jellies. Dark glossy green leaves, bushy growth.

COMMON SNOWBALL (*Viburnum Opulus Sterile*). White balls of blooms in May. A well known very popular shrub. **Price: 15 to 18 in., 40c each; \$3.50 per 10.**

JAPANESE SNOWBALL (*Viburnum Tomentosum Plicatum*). A shrub of compact upright habit which has highly ornamental foliage, and which during late May and early June bears dense clusters of pure white flowers in great profusion. **Price: 18 to 24 in., 60c each; \$5.00 per 10. 2 to 3 ft., 70c each; \$6.00 per 10.**

WHITE SNOWBERRY. This low, shade-loving plant bears rose-white flowers in summer, and large white berries in winter. A superb fine-textured shrub for borders and shady foundation plantings.

CORALBERRY or INDIAN CURRANT. A dwarf shrub which thrives in the shade. The coral-colored berries last until late winter, and are produced profusely.

SPIREA ANTHONY WATERER. A dwarf and very dense little shrub which bears flat clusters of rose-pink flowers all summer. If the bloomed heads are removed it will continue to flower more abundantly. **Price: 12 to 15 in., 35c each; 10 for \$3.00. 15 to 18 in., 40c each; 10 for \$3.50.**

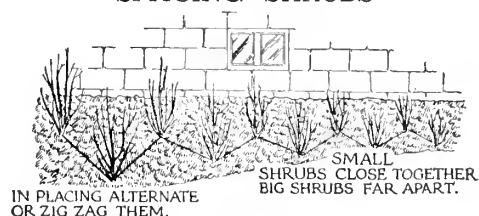

SPIREA, BILLIARD'S (*Spirea Billiardi*). Erect, sparsely twigged branches crowned with dense spikes of rose-pink flowers from July to September.

SWEET SHRUB (*Calycanthus Floridus*). Sometimes called the Strawberry Shrub. A widely cherished old-fashioned plant. Neat, compact, with large leaves and small double blossoms of dark mahogany color with rare fragrance. Blooms in May and June with a few blossoms from time to time during the summer.

WEIGELA, RED-FLOWERED (*Weigela Eva Rathke*). Dark reddish green foliage, and dark red blossoms. Somewhat dwarfish in habit of growth, and an excellent specimen for border planting. Blooms throughout the summer and fall.

WEIGELA, PINK (*Weigela Rosea*). A tall, vigorous shrub which bears a profusion of deep pink flowers in June and more sparsely at intervals thereafter through the summer. Most popular of all the Weigelas.

Evergreens

For Lawn
PLANTINGS

The modern landscape demands these beautiful evergreens—their elaborate foliage pattern, and their rich color blends.

Remember, too, they are supremely hardy and drought-resisting. For the entrance, foundation planting, or formal garden, these Bunting Junipers and Taxus are the last word in elegance.

ARBOR-VITAE

AMERICAN ARBOR-VITAE (*Thuja Occidentalis*). Foliage flat, set on edge, color bright green. One of the most extensively planted Arbor-Vitae. Price: 18 to 24 in., each, \$1.35; 10 for \$11.00. 2 to 3 ft., each, \$2.00; 10 for \$17.50.

BERCKMANN'S GOLDEN ARBOR-VITAE (*Biota Aurea Nana*). Conical form, very dense and compact, bright yellow foliage. Price: 12 to 15 in., each, \$1.40; 10 for \$12.00. 15 to 18 in., each, \$1.80; 10 for \$15.00.

CHINESE ARBOR-VITAE (*Biota Orientalis*). Tall, slender, fast grower; dark green foliage. 18 to 24 in., each, \$1.25; 10 for \$10.00. 2 to 3 ft., each, \$2.00; 10 for \$17.50.

GLOBE ARBOR-VITAE (*Thuja Globosa*). Very dwarf in growth, round or globe shaped, foliage dark green. Does not require shearing. Price: 10 to 12 in., each, 95c; 10 for \$8.00. 12 to 15 in., each, \$1.25; 10 for \$10.00.

PYRAMIDAL ARBOR-VITAE (*Thuja Pyramidalis*). Tall, slender, dense, dark green foliage. The best Arbor-Vitae grown. Price: 2 to 3 ft., each, \$2.25; 10 for \$20.00.

FIR

WHITE FIR (*Abies Concolor*). Tall, rapid grower, rich silvery needles. One of the showiest and most graceful of all the Firs. Price: 18 to 24 in., B&B, \$2.50 each; \$22.50 per 10. 2 to 3 ft., \$3.00 each; \$27.50 per 10.

HEMLOCK

CANADIAN HEMLOCK (*Tsuga Canadensis*). Graceful tree with dark green foliage; very hardy. Price: 18 to 24 in., \$1.75 each; \$15.00 per 10. 2 to 3 ft., \$2.75 each; \$25.00 per 10.

SPRUCE

NORWAY SPRUCE (*Picea Excelsa*). Perfectly hardy. Compact growth. Green foliage. Price: 18 to 24 in., \$1.35 each; \$11.50 per 10. 2 to 3 ft., \$2.00 each; \$17.50 per 10.

YEW

Especially popular because of their comparative freedom from disease.

UPRIGHT JAPANESE YEW (*Taxus Cuspidata Capitata*). A beautiful slow growing evergreen, with rich dark green foliage throughout the year. Price: 18 to 24 in., each, \$2.00; 10 for \$17.50.

SPREADING JAPANESE YEW (*Taxus Cuspidata*). A compact, spreading variety, dwarf habit of growth. Very hardy; handsome dark green foliage. Covered with bright rose-red fruits in autumn. Price: 15 to 18 in., B&B, \$2.25 each; \$20.00 per 10.

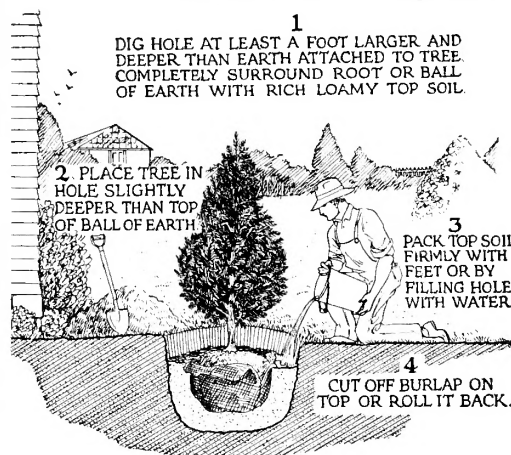

Tsuga Canadensis

Taxus Cuspidata Capitata

How to Properly Plant Evergreens

Add Loose Soil Until the Hole is Filled and Pack Firmly and Leave Liberal Supply of Loose Earth On Top

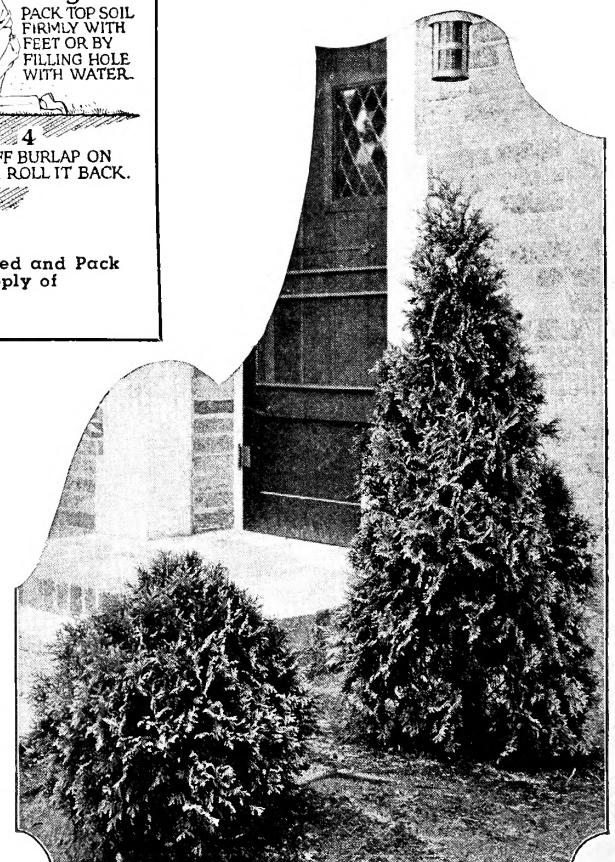

OUR EVERGREENS

We have specialized in growing Evergreens for years, and this season have the finest specimens in many years.

Because the sap of the Evergreen is resinous and must not become dry for fear of killing the plant, all Buntings' Evergreens are balled and burlapped in soil before shipment is made.

We are proud of our Evergreens. Visitors tell us we have the best specimens in the country.

Landscape men, write for our special prices in quantity lots.

EVERGREENS

JUNIPER

IRISH JUNIPER (*Juniperus Hibernica*). Trees form dense slender cones of silvery green. Price: 18 to 24 in., each, \$1.25; 10 for \$10.00. 2 to 3 ft., each, \$2.00; 10 for \$17.50.

PFITZER'S JUNIPER (*Juniperus Pfitzeriana*). Broad, bushy, with gray-green branches. Price: 18 to 24 in., each, \$3.00; 10 for \$27.50.

SAVIN JUNIPER (*Juniperus Sabina*). Low growing, very dwarf. Dark green foliage, very desirable; never gets large. Price: 2 to 3 ft., each, \$4.00; 10 for \$37.50.

SPINY GREEK JUNIPER (*Juniperus Excelsa Stricta*). Gray-green foliage, compact, pyramidal, well shaped. Price: 18 to 24 in., each, \$2.00; 10 for \$17.50.

PINE

AUSTRIAN PINE (*Pinus Austriaca*). Strong spreading growth, round form, with regularly arranged branches. 2 to 3 ft., each, \$3.00; 10 for \$27.50.

RETINOSPORA

GOLDEN PLUMELIKE CYPRESS (*Retinospora Plumosa Aurea*). Foliage and growth like the Plumed Cypress except that the foliage is tipped with bright gold. Price: 18 to 24 in., each, \$1.75; 10 for \$15.00. 2 to 3 ft., each, \$2.50; 10 for \$22.50.

PLUME-LIKE CYPRESS (*Retinospora Plumosa*). Soft, deep green foliage. Strong growing tree. Price: 18 to 24 in., each, \$1.75; 10 for \$15.00. 2 to 3 ft., each, \$2.50; 10 for \$22.50.

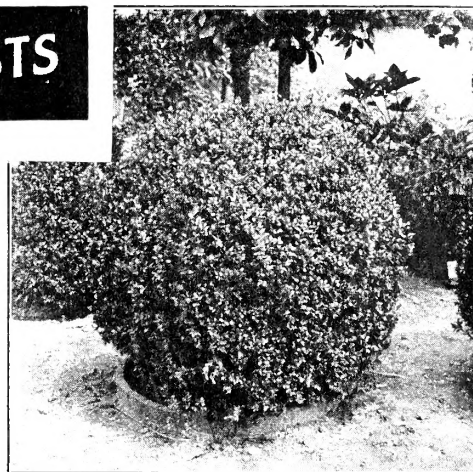

Pfitzer's Juniper

Dwarf English BOXWOOD

Live for Centuries

English Boxwood is easy to grow and will thrive in most every type of soil. After this plant once becomes established, it does not require any particular attention. Excellent for dwarf hedges or in front of a foundation planting. Price: 8 to 10 in., each, 70c; 10 for \$6.00. 21 to 24 in., each, \$5.00; 10 for \$45.00.

Dwarf English Boxwood

BROADLEAF EVERGREENS

BUSH ARBUTUS (*Abelia Grandiflora*). Blooms from May to frost; grows into a compact, graceful bush, stands shearing well and thus can be used for a hedge. Foliage a bright, glossy, shiny green, turning to bronze in winter; blooms are funnel-shaped, light pink in color. A hardy plant. Price: 18 to 24 in., each, 80c; 10 for \$7.00.

AMERICAN BOXWOOD (*Buxus Sempervirens*). Grows into a medium-sized bush of somewhat squatty conical shape. Very dark green foliage. Price: 10 to 12 in., each, 70c; 10 for \$6.00.

AMERICAN HOLLY (*Ilex Opaca*). Foliage intense green. Produces an abundance of red berries in the fall. Price: 2 to 3 ft., each, \$2.00; 10 for \$17.50. 3 to 4 ft., each, \$2.75; 10 for \$25.00.

JAPANESE HOLLY (*Ilex Crenata*). Evergreen; stubby, twig-like branches with boxwood-like leaves of pleasant dark green color. Small black berries. Rarely gets more than 5 feet tall. 2 to 2½ ft., each, \$3.00; 10 for \$25.00.

Azalea Hinodegiri

One of the Loveliest Evergreen, Flowering Shrubs Grown

Good deep green foliage and bright scarlet flowers completely covering the plant in late spring. Price: 6 to 8 in., each, 75c; 10 for \$6.00. 8 to 10 in., each, \$1.00; 10 for \$8.50. 10 to 12 in., each, \$1.25; 10 for \$10.00.

Azalea Hinodegiri

The HEAVY BEARING **MASTODON** *Everbearing* Strawberry

Three Full Crops In 18 Months—Three Big Profits

The name Mastodon was conceived to describe the largest animal; hence denoting size. So it's true with Everbearing Strawberries, the variety called Mastodon far exceeds in size all other everbearing varieties originated to date. We place Mastodon on top of the list.

Any soil of high fertility will produce bumper crops of this outstanding everbearing variety. Mastodon is also rightly named because it exceeds them all in number of berries per acre during the fruiting season, which extends from spring until late autumn. A fine shipper, brings more per quart, and, last but not least, it is a delicious berry for home use.

Buntings' for a number of years have given extra attention to the breeding of this variety, and offer you a special strain. Our plants have large crowns, heavy fibrous roots and are definitely superior. **Price: 25 for 40c; 100 for \$1.00; 1000 for \$7.00.**

It's a GEM and rightly named

ANOTHER EVERBEARER THAT CAPTURES THE PATRONAGE OF MULTITUDES OF GARDENERS

Bears sixty to ninety days after planting. This variety is one of the greatest everbearing strawberries, and should be planted as a companion with Mastodon. Berries are long, and we find them to be as productive but not as large as Mastodon. They ripen evenly and are light red all the way through. For best results we recommend planting an equal number of Mastodon and Gem. **Price: 25 for 40c; 100 for \$1.00; 1000 for \$7.00.**

See pages 23 to 30, inclusive, for complete descriptions and prices on a general line of the best varieties of Strawberry plants. Read about the new Starbright listed on page 28, offered this season for the first time.
